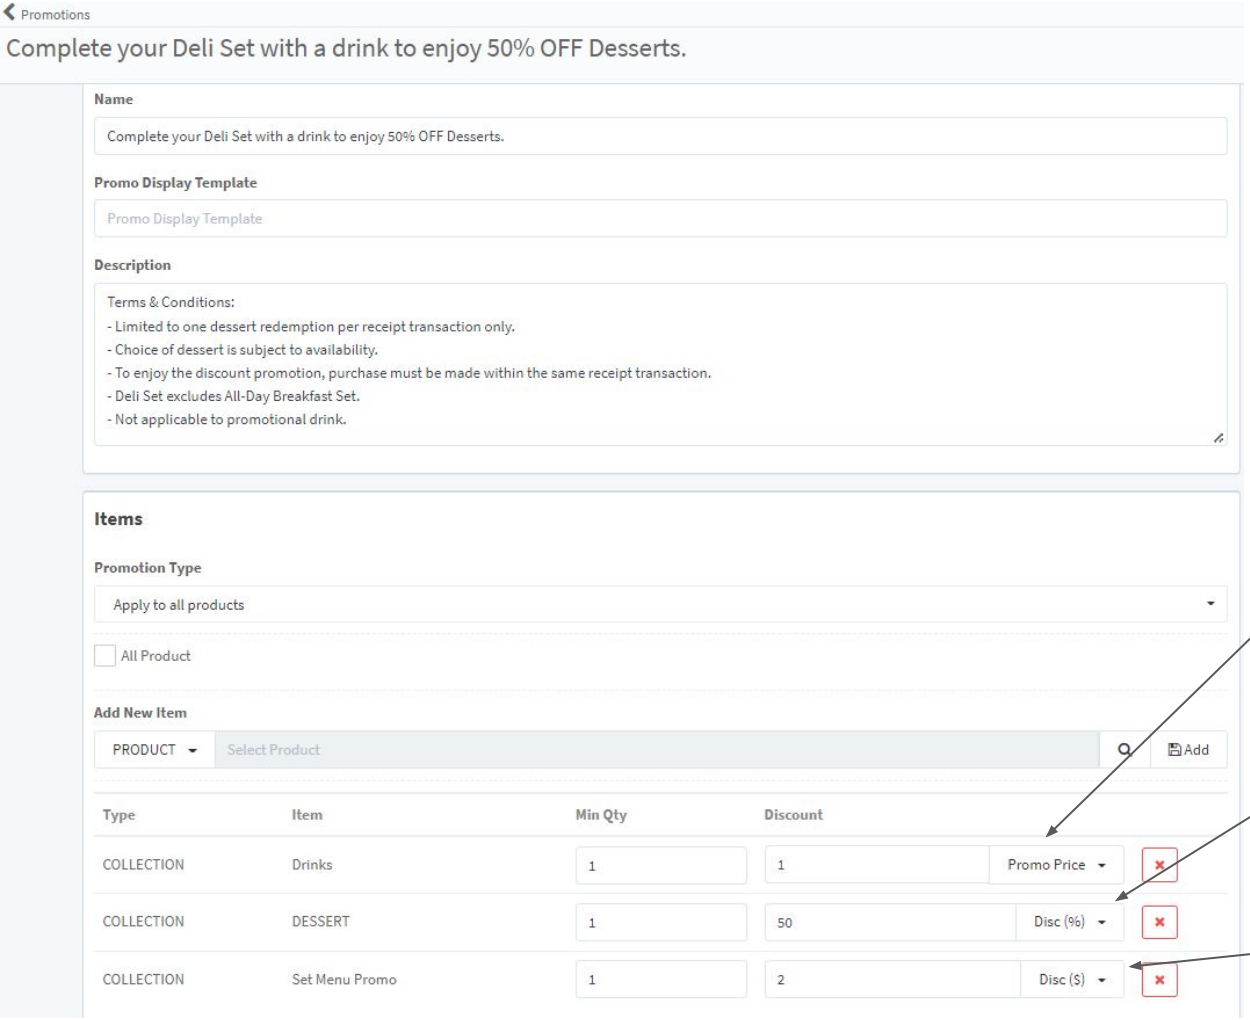
Name: you can add the collection name here

Description: You can briefly explain what the collection is about.

In this section, you can add what products that will be in specific collection

CRM Product

Product Promotion



Promotion Detail

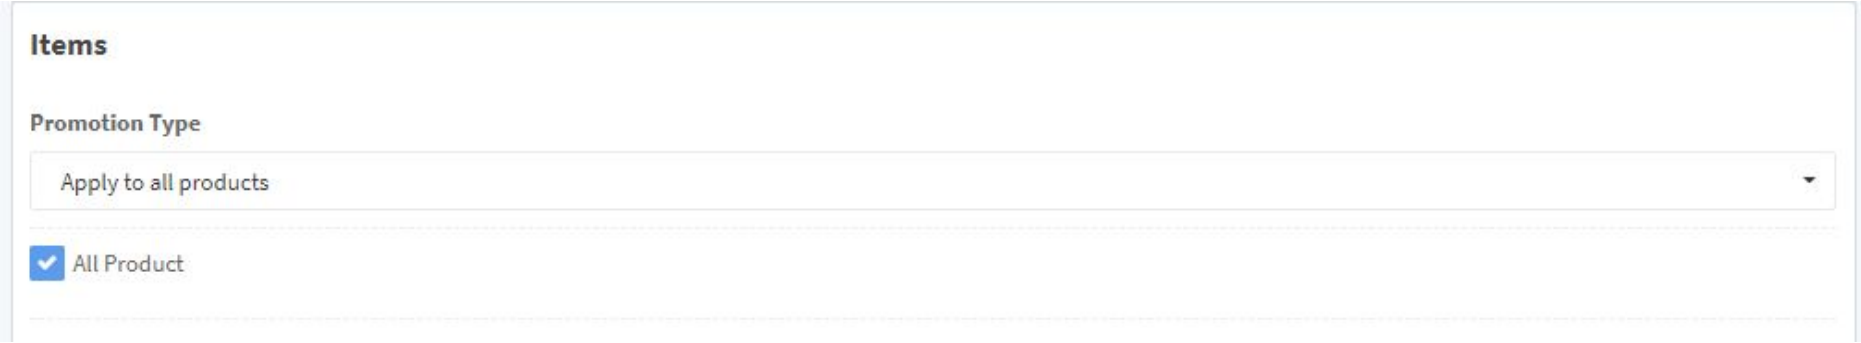
Name: This promo name will be shown in the promotion section in the product detail
Promo display template: This promo display name will be shown promotion section in the product detail.
Description: You can briefly explain what the product promotion is about.

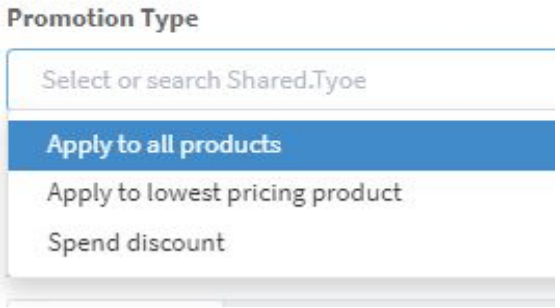
There are several discount types that merchants can give to the customer:

Promo price: This kind of promo will change the product price. For example, the product price is SGD 10, and you set the promo price at SGD 5. So, the product price changed to SGD 5.

Percentage discount: This discount will cut the total price from all of the products included in the campaign. For example 10%, 5%, 2% discount.

Nominal $ discount: This discount will cut the total price from all of the products included in the campaign. For example, SGD 10, SGD 5, and SGD 2 discounts.



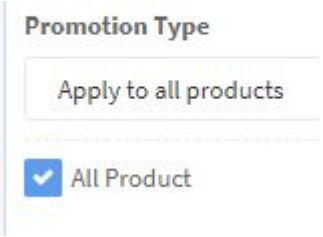


✅ **All products:** the promotion will be applied to all your products.

Apply to the lowest-pricing product: the promotion will be applied to a product that has the lowest price

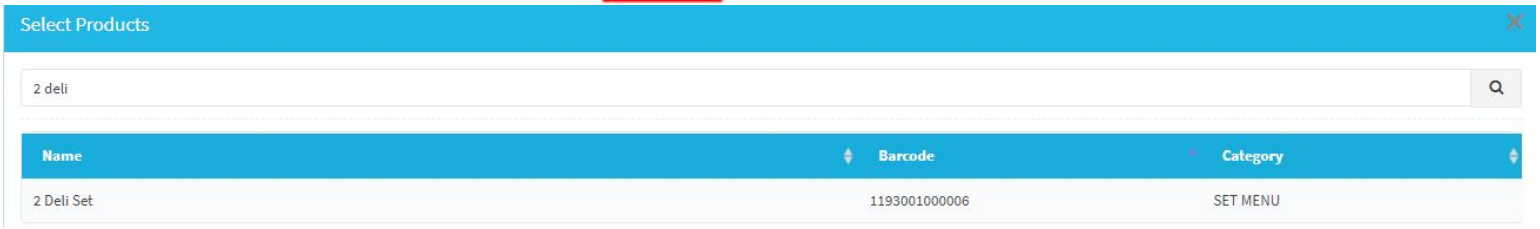
Spend discount: The discount can be applied to selected products/categories/collections, also all products. The discount will be divided among the products.

Add New Item: You can add multiple items, categories, or collections.

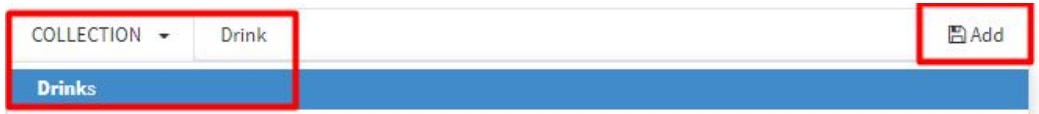


You will see an "**All Product**" check box; if you tick the check box, your promotion will be the highest priority among all ongoing promotions.

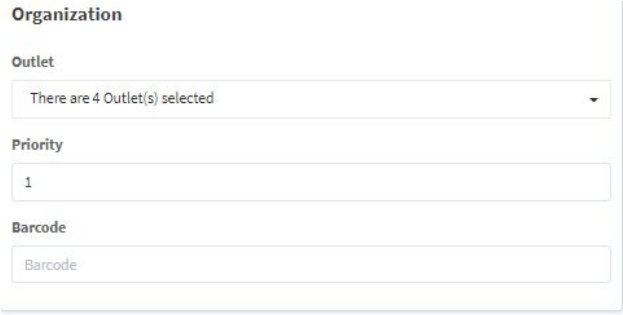
To choose a product → you can click the select product field to see the product list popup → Select an item → the popup will be closed → click **"add"** to add the item to the list → specific item added to the list will be included to the promotion.



To choose a category, you can click select or search category to see the category list → select a category → the popup will be closed → click "add" to add a category to add selected category into the list → by adding the category, all of the items under added category will be included to the promotion.

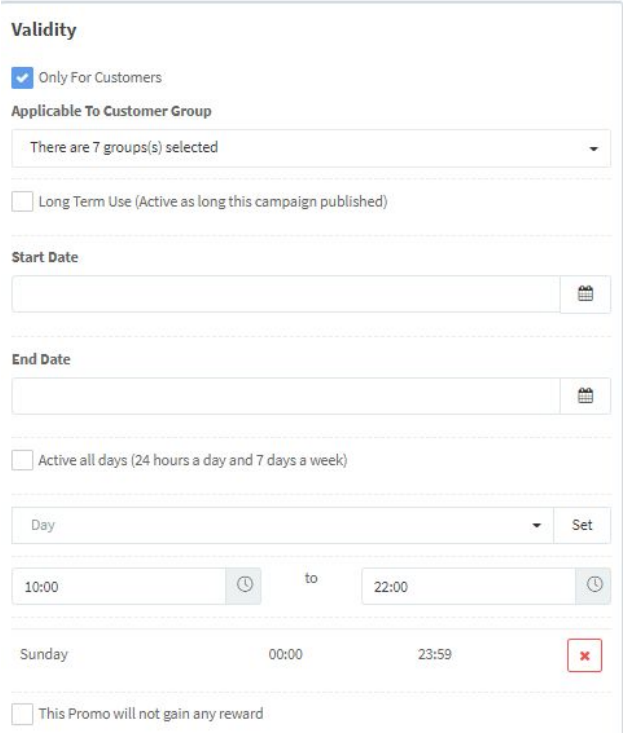


To choose a collection, you can click select or search collection to see the collection list → select a collection → the popup will be closed → click "add" to add a collection to add the selected collection to the list → by adding the collection, all of the items under added collection will be included to the promotion.



Outlet: merchant can change in which outlet the promotion will be shown.

Priority: merchant can set which promotion will affect the product price by giving priority on it.



✅ **Only for customers:**

✅ **Long Term Use (Active as long this campaign is published):** By ticking the Long-Term Use check box, this promo will is published as long as you don't stop or delete it setup.

Can set Specific start and end date. If did not tick the check box

✅ **Active all days (24 hours a day and 7 days a week)**
Can set multiple specific date and time

✅ **This Promo will not gain any reward**: the customer will not get any reward when buying some product that already set in this product promotion

Target

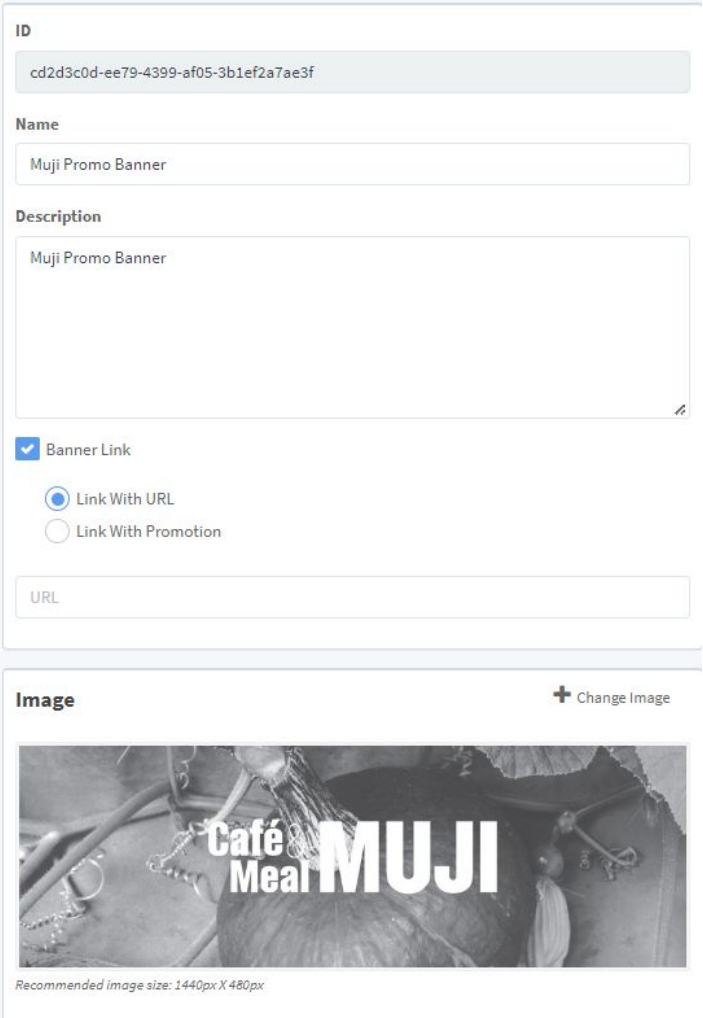
List Email Separated by Comma (xxxxx@edgeworks.com.sg,xxxx@gmail.com)

List Mobile Number Separated by Comma (+6512345678,+6509876543)

Limit : limit how many users get this autodrive or benefits

CRM Promotion

Promo Banner

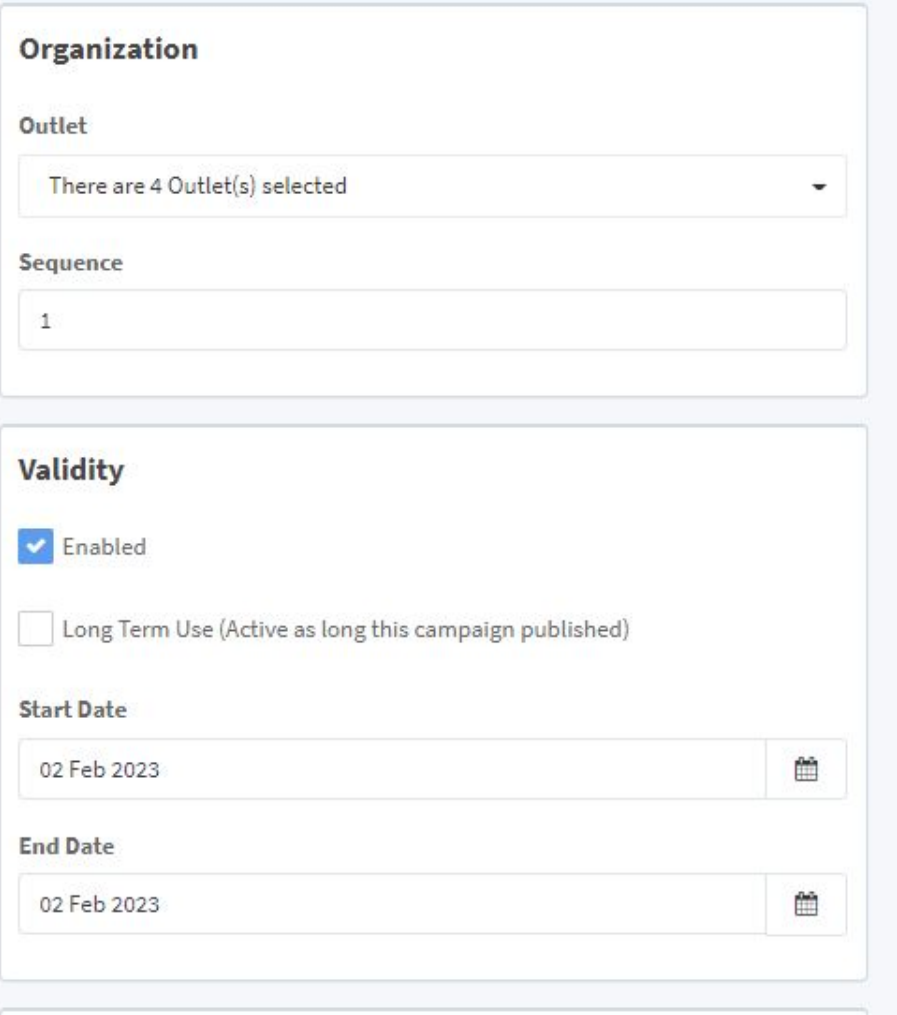


How to add a promotion banner?

In admin portal go to promotion menu and select promo banner
Enter the banner name and descriptions
For now, if user click the banner the description will be shown later on webordering/app
Use 1440px x 480px for the banner size (ratio= 3:1)

By ticking the **banner link check box**, you can link the promotion banner with an external link or with an ongoing promotion

if you choose link with URL, you can add external link. it can be your Instagram business account, a website, or etc.



In **Organization** section you can choose in which outlet your banner will be shown and edit the order in sequence section.

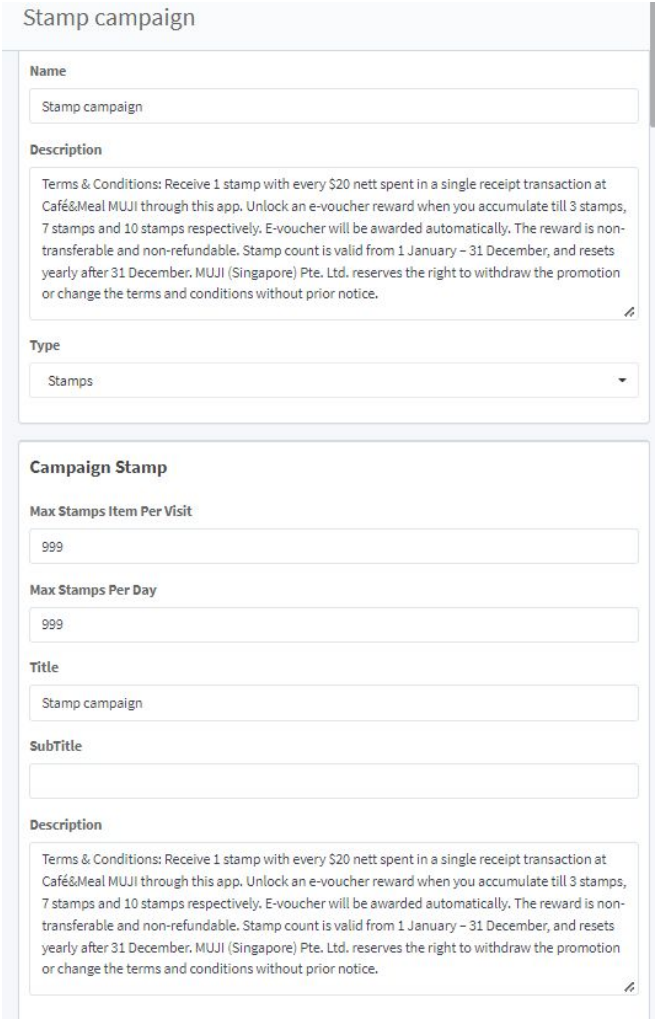
In **Validity** section, you can tick enable to make the banner shown to the webordering/app

In **Validity** section, you can tick the long-term use (Active as long this campaign published) checkbox if you want to show the banner as long as you want.
If you don't tick the long-term use (Active as long this campaign is published) checkbox, you can enter the start and end date for the banner will be shown.

Save to show the banner

CRM Promotion

Campaign Stamp

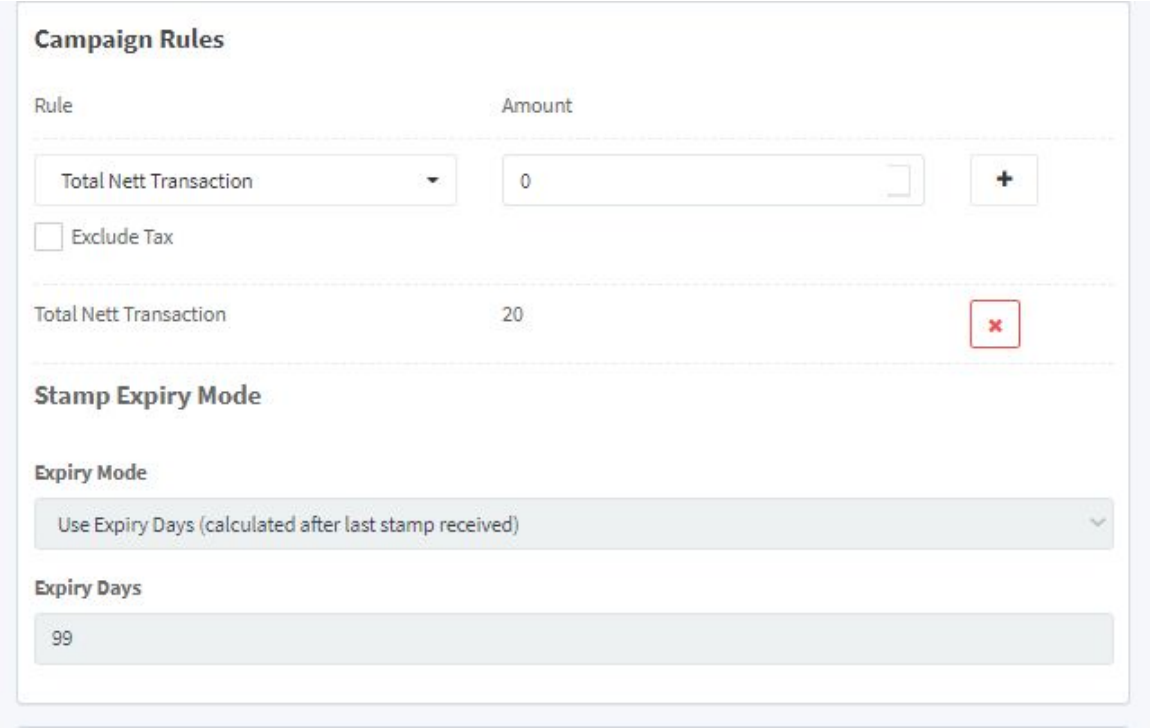


How to setup a stamp on the admin portal

Name → Fill campaign name.
Description → Fill Description name
Type → choose **stamps**

Campaign Stamp

Max Stamps Item Per Visit → add the maximum amount of stamp that the customer will receive on a visit
Max Stamps Per Day → add the maximum amount of stamps that will be received by the customer per day
Title → Title of Stamp
Subtitle → Subtitle of the stamp, example: “How to get stamp”
Description → Description of the stamp, for example, you can add information on how many stamps the customer will get and how to get them.



Campaign Rule
On rule amount, choose total net transaction or **total quantity**

Add an amount of **total net transaction** or total quantity → this amount will be a requirement for a customer should meet to get a stamp

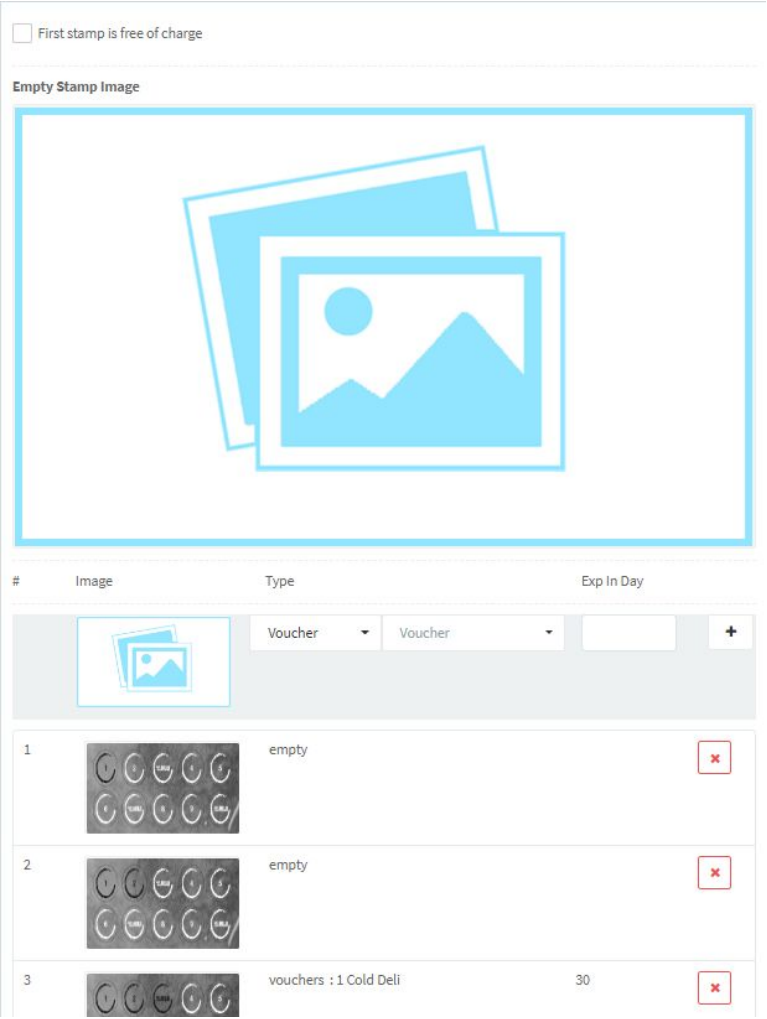
Exclude tax → by ticking the exclude tax, the tax will be included in the added amount

You can add both the total net transaction and total quantity

Card Expiry Days (calculated after the last stamp received) → add the amount of days the card will be expired

OR

you can tick **follow membership period** to set the expiry days following the membership period expiry



First stamp is free of charge = if you tick the checkbox, the customer will be immediately given a stamp on the first time after signing up or completing their profile

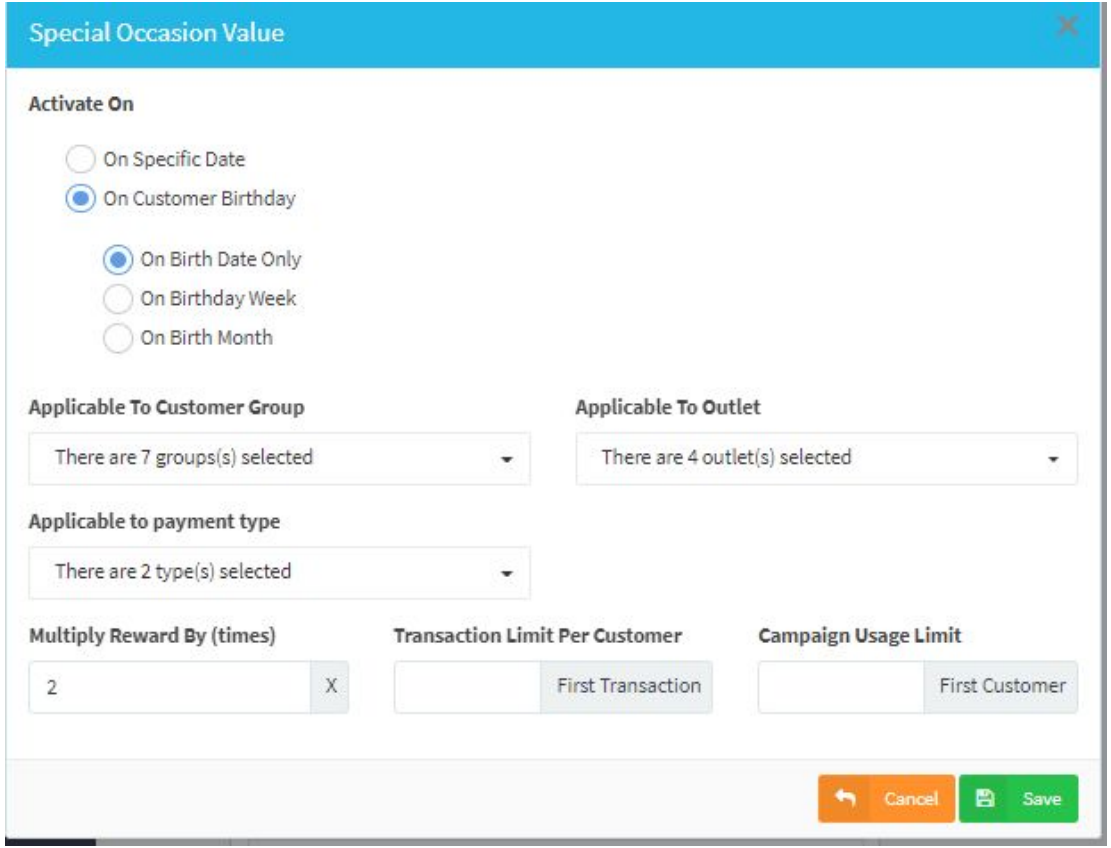
Empty stamp image = this is the first state the stamp section will look like in customer (empty state)

After ticking the First stamp is free of the charge check box, the first stamp list will be automatically added

Add a stamp image and set up each stamp → in this section, you can set what kind of stamp the customer will receive. t can be an empty stamp (stamp only) or a stamp with a voucher. Also, you can upload an image for each stamp.

> Empty stamp → In the type of stamp dropdown, you can choose **empty.**
>
> Stamp with voucher → If you want to give a stamp with a voucher, choose voucher instead of empty in the type dropdown and choose which voucher you will be given. You can also set up the voucher expiration day.

Click the **+ (plus) button** to add the stamp to the list



Active on → Choose this campaign to be activated on a specific date or on the customer's birthday

If you choose a specific date meaning you can set up the start and the end date of giving this stamp.

If you choose on customer's birthday, meaning you will be giving the stamp on the customer's birth date/week/month

Applicable to customer group → you can set up which customer group can receive the special occasion stamp.

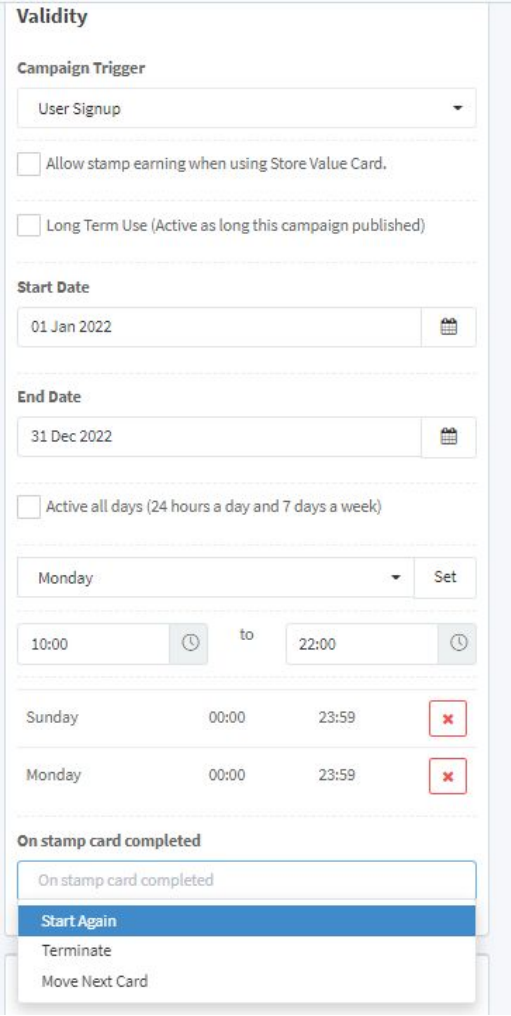
Applicable to outlet → you can set up in which outlet the customer able to receive the unique occasion stamp

Applicable to payment type → you can choose what kind of payment method the customer used to receive this stamp

Multiply reward by (times) → Current reward will be multiplied as entered number

Transaction limit per customer → limit for the specific time's transaction was made by the customer.

Campaign usage limit → limit for a specific number of customers using this campaign



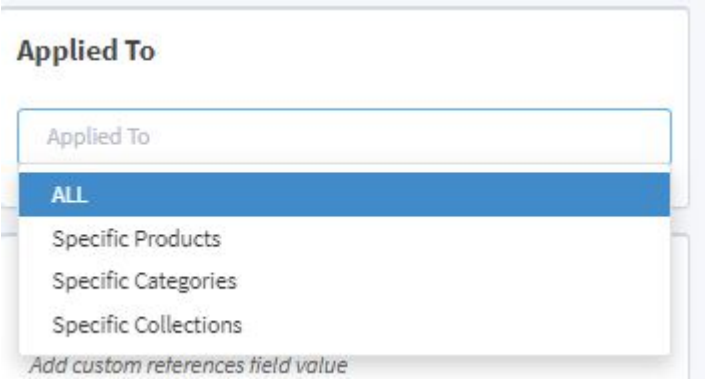
Campaign trigger = you can choose when a customer will start receiving a stamp
User signup → by choosing this trigger, meaning the customer will receive the stamp once they did the signup process
Complete profile → by choosing this trigger, meaning the customer will receive the stamp once they completed the profile

Long-Term Use (**Active as long this campaign published**) → by tick the checkbox meaning this campaign will be active as long as this campaign is published

Active all days (24 hours a day and 7 days a week) → by tick the checkbox meaning this campaign will be active 24/7
You can also set up the date for this campaign (by not ticking the checkbox)

On stamp card completed → this is a setup for what kind of action will be made if the customer is already given a full of stamp

Star again → the customer should start over the stamp collection
Terminate → the stamp collection will be stopped
Move to the next card → the customer will start a new stamp campaign (it can be a different value, different time of use, or different requirement)



This is a setup for which product/category/collection the customer buy will receive the stamp. You can add multiple products, categories, collection
