Introduction

This guide explains the steps for processing a **Kris+ QR payment** using the POS system, including how to manually verify a payment in the event of network issues.

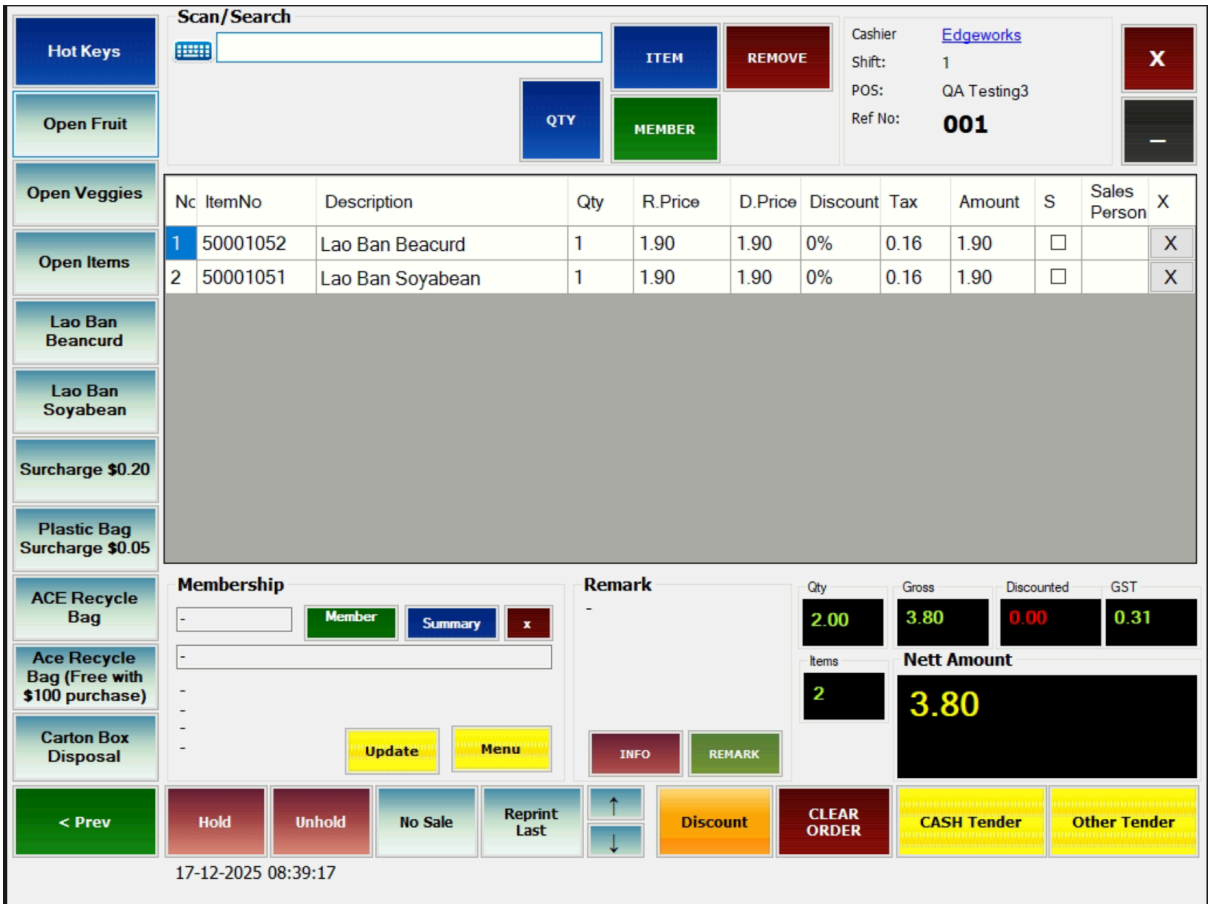
Prerequisites

- POS system is powered on and logged in
- Kris+ payment method is enabled on the POS
- Internet connection is available

Step-by-Step Instructions

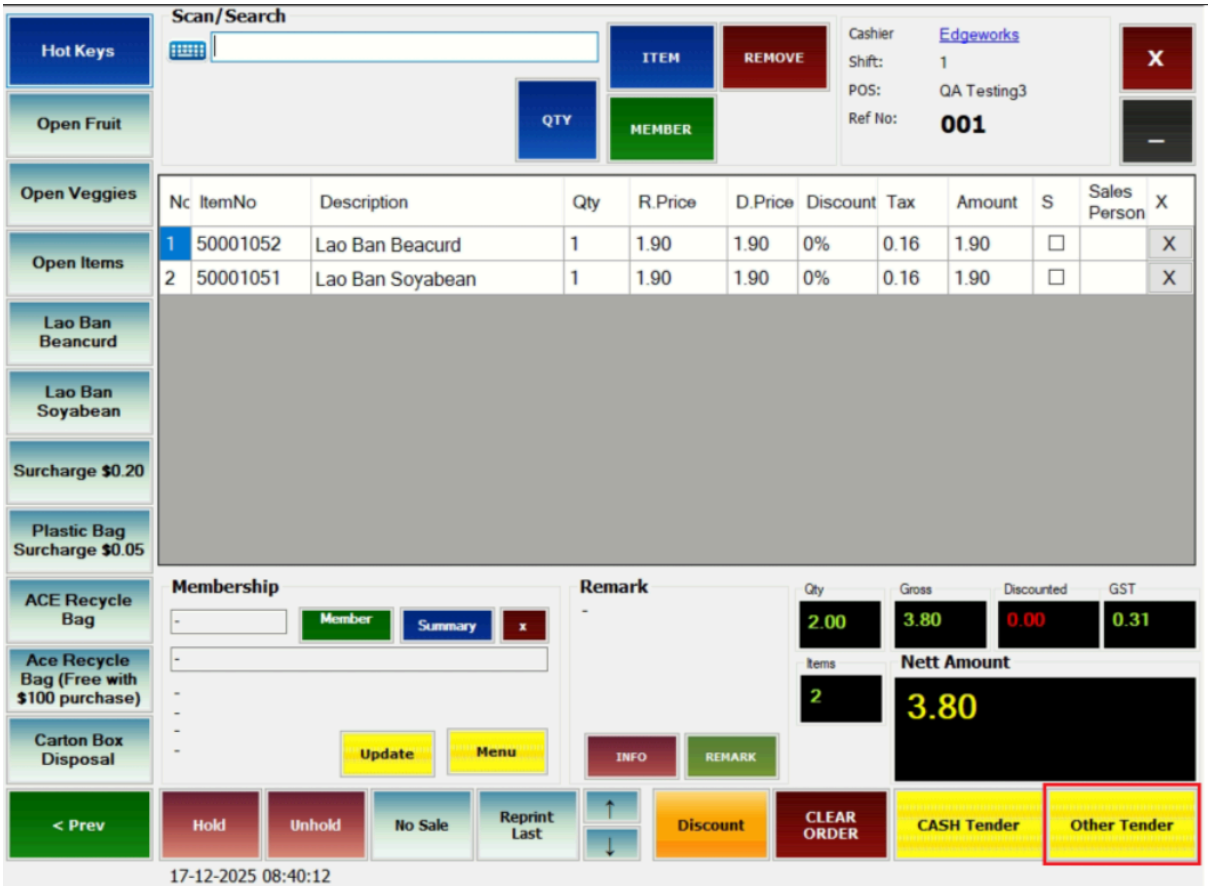
Step 1: Open POS and Scan Item

Open the POS system and scan any item as usual.



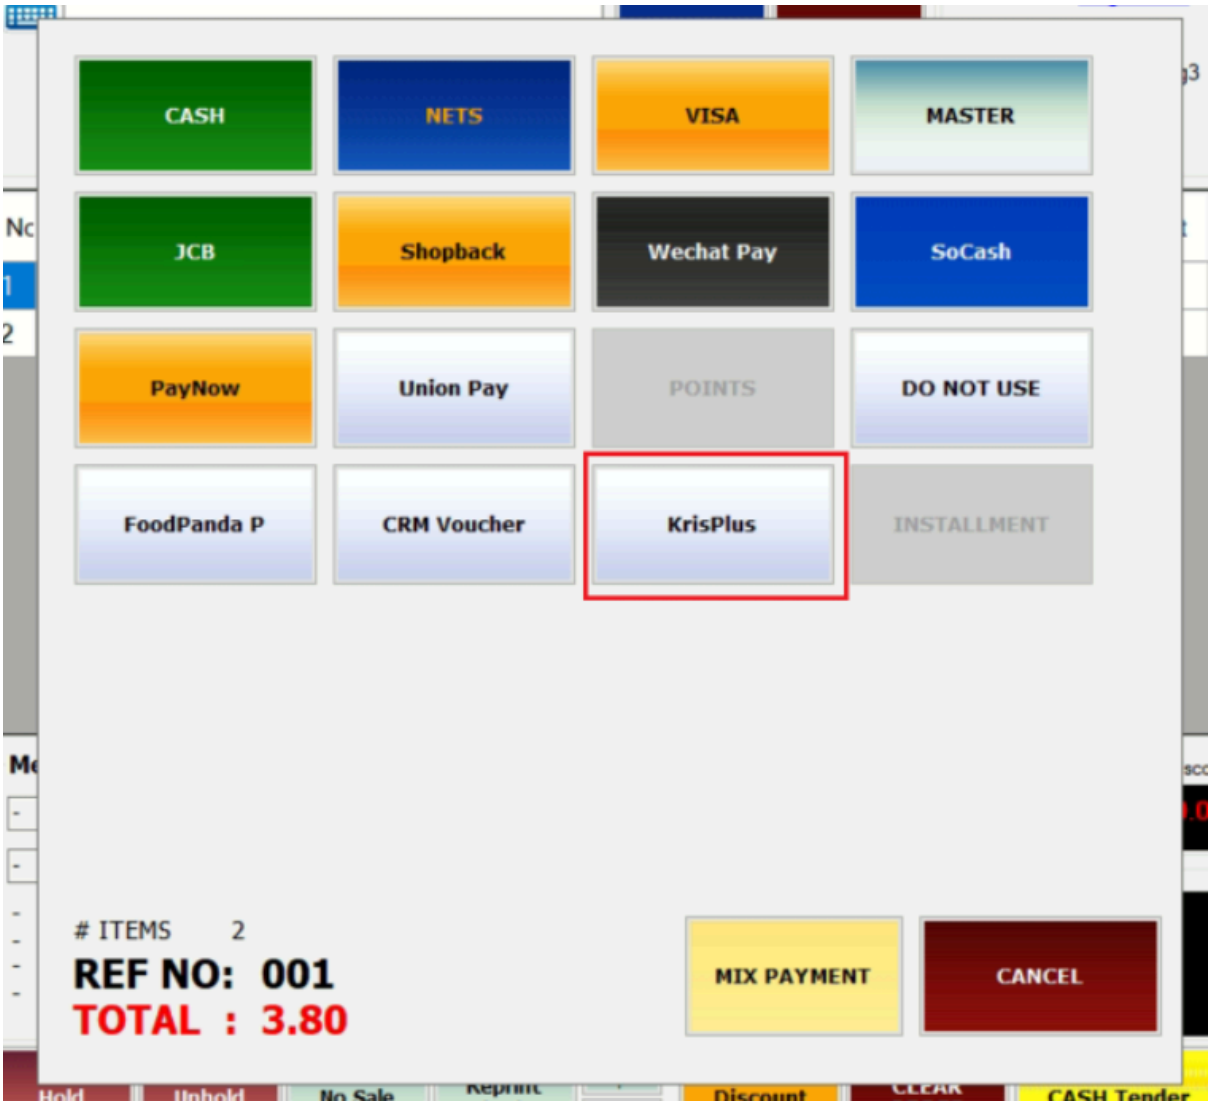
Step 2: Confirm the Order

Once all items are scanned, press the **Other Tender** button to proceed to the payment selection screen.



Step 3: Select Kris+ Payment Method

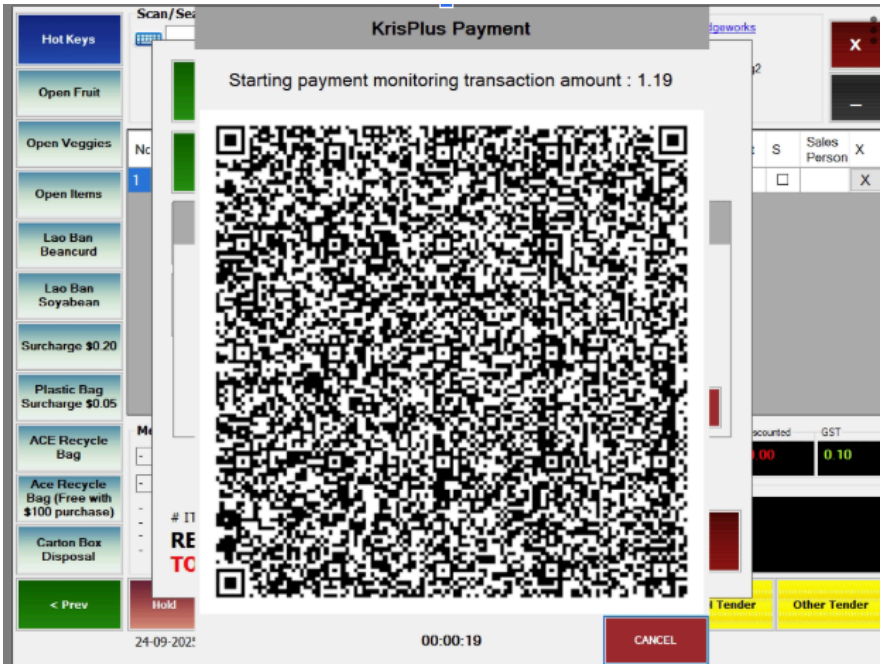
On the payment selection screen, press the **Kris+** button.



Step 4: QR Code Is Displayed

After selecting Kris+, a **QR code will be displayed** on:

- The **cashier screen**
- The **second customer-facing screen**

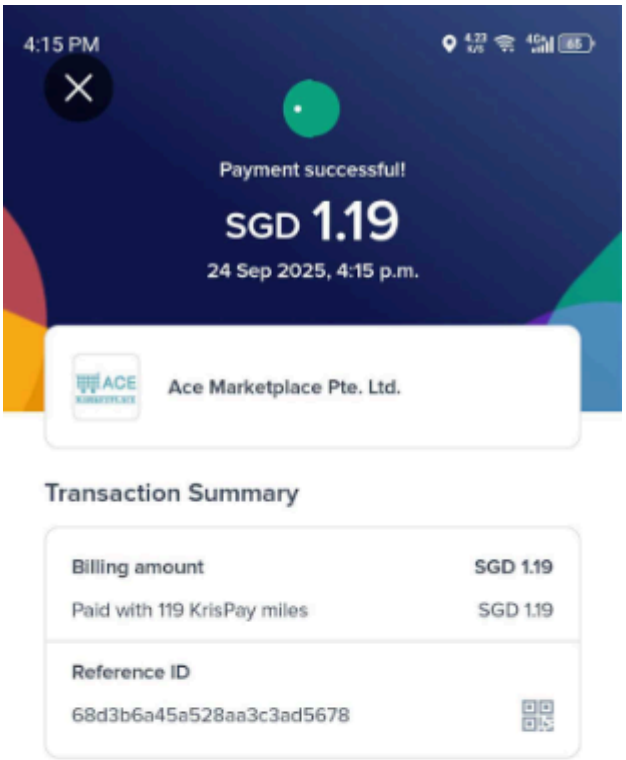


Step 5: Customer Scans QR and Makes Payment

The customer scans the QR code using the **Kris+ app** and completes the payment on their mobile device.

Step 6: Transaction Completed

Once payment is successful, the POS will automatically update and complete the transaction.



Manual Verification (Network Issue Handling)

When to Use Manual Verification

If there is a **network delay or issue**, and the transaction does not update automatically:

- Wait **2 minutes**
- A **Verify Manual** button will appear on the POS

Manual Verification Steps

1. Press the **Verify Manual** button
2. The POS will check the transaction status directly with **Kris+**
3. If payment is confirmed, the transaction will be completed successfully
