Introduction

Thank you for using our Mobile Point of Sale (POS) system. This user guide was designed to help you navigate through the various features and functionalities of the application, ensuring you can perform transactions efficiently and effectively.

From secure authentication and managing your cart to applying discounts and finalizing payments, our Mobile POS system is built to streamline your sales process and enhance your overall business operations. Whether you're handling daily sales, managing inventory, or closing out at the end of your shift, each feature is crafted to provide ease of use and reliability.

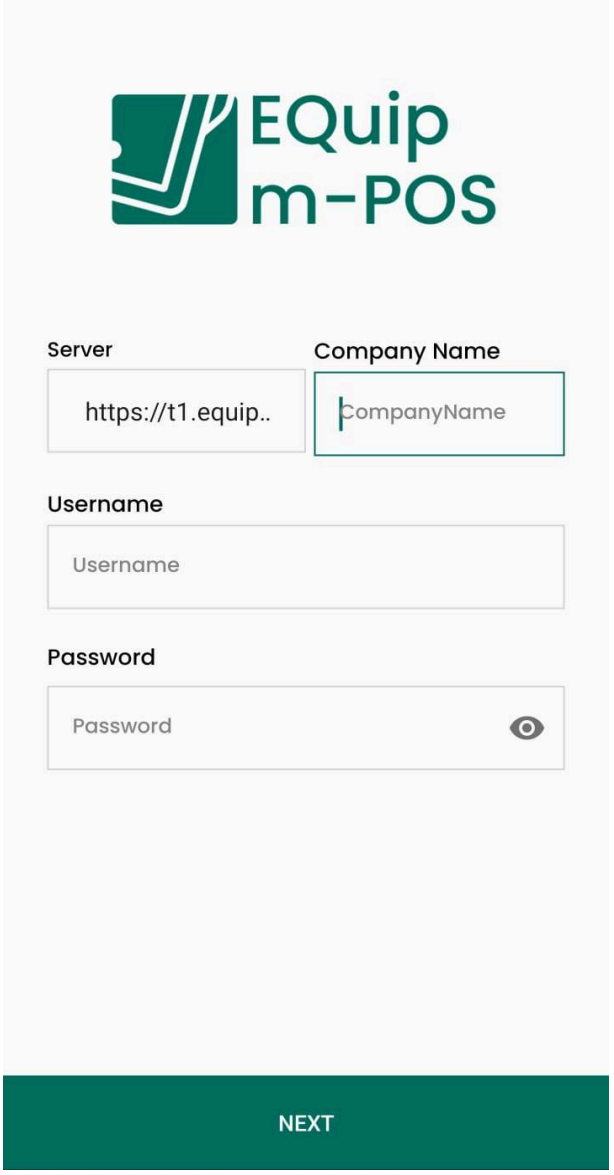
We hope this guide has equipped you with the knowledge and confidence to make the most of our Mobile POS application. Should you have any further questions or need additional support, our customer service team is always here to assist you.

Thank you for choosing our Mobile POS system. Here's to smoother transactions and a more efficient business operation!

1 Authentication

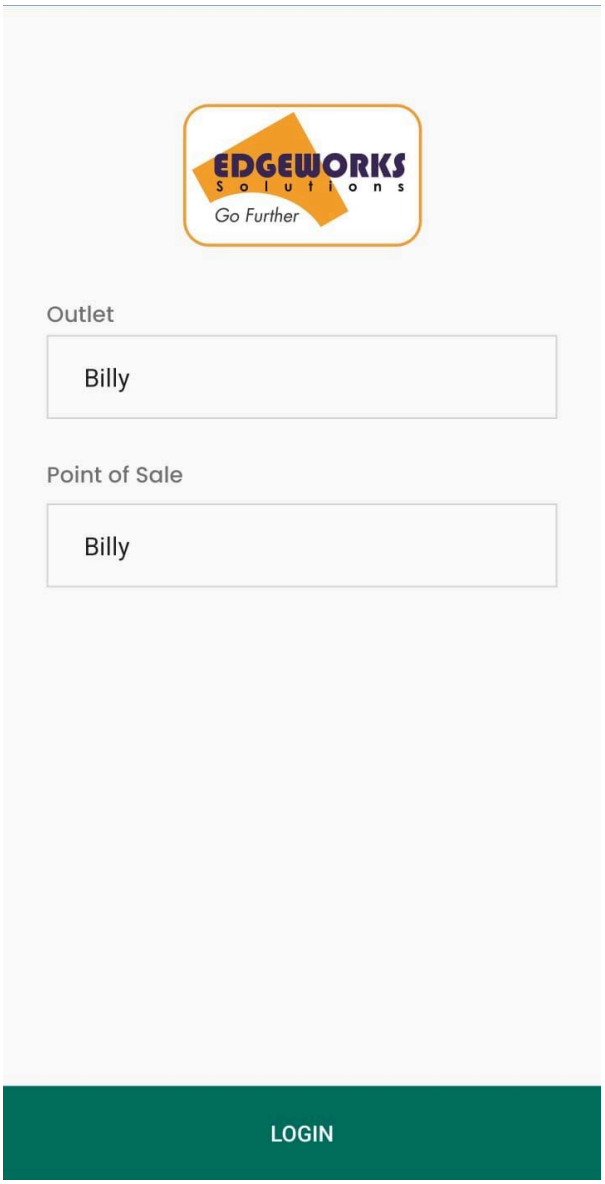
1.1 Initial Setup

When you first start using our mobile POS app, you'll need to input some essential information to get started. This includes your company's URL and name, your username, and your password. Additionally, you'll select the outlet and POS (Point of Sale) you want to access. This step ensures that you're connected to the right place and ready to begin using the app.



1.2 Logging In

Once you've completed the initial setup, logging in becomes a breeze. Simply input your username and password, and you're good to go. No need to re-enter your company details or select outlets and POS again – we've got that covered for you.

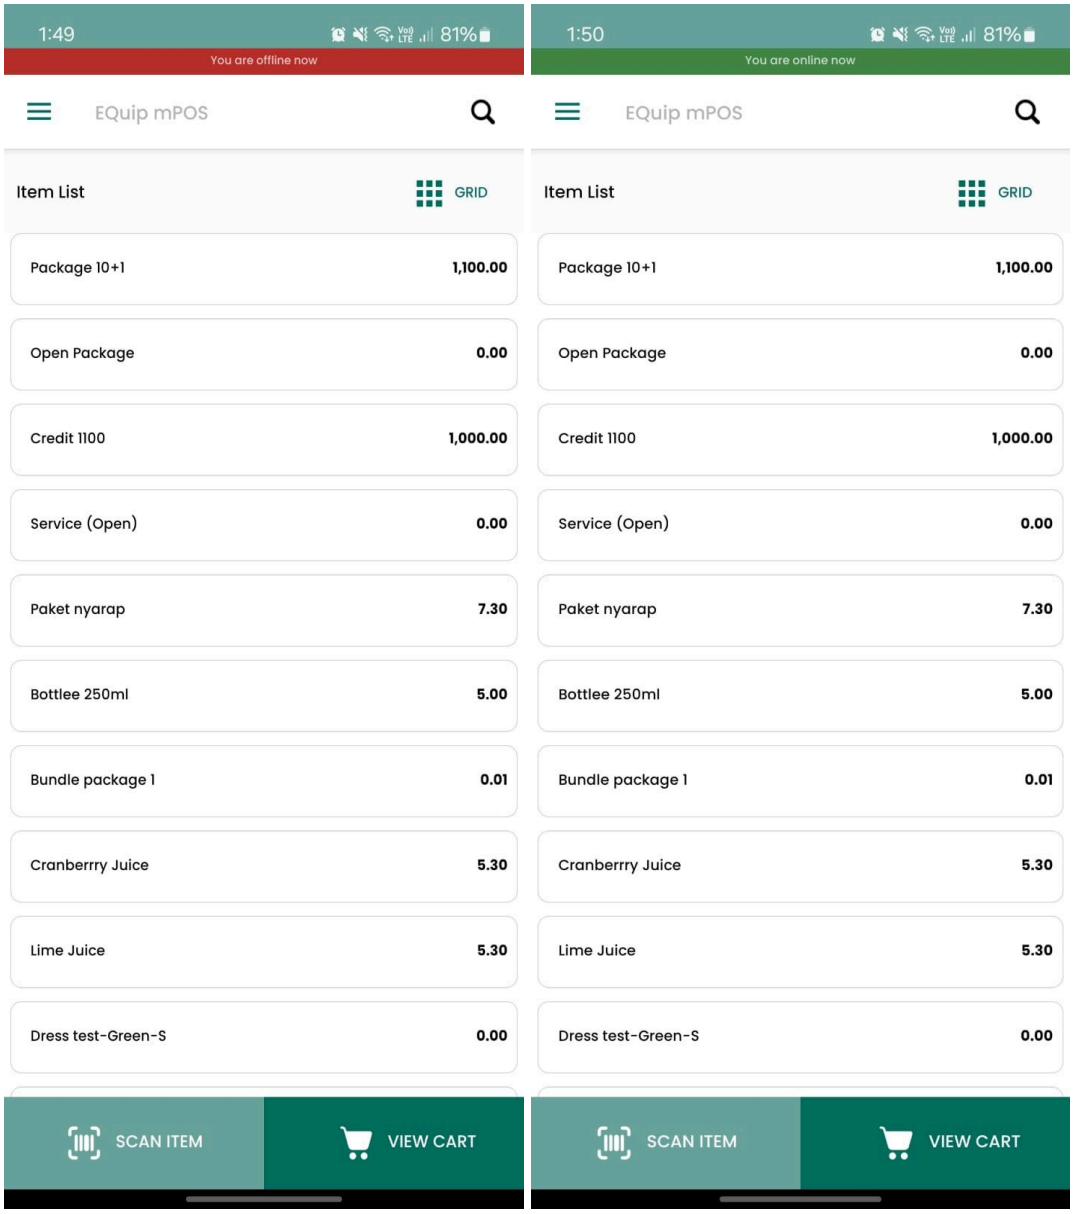


By streamlining the login process after the initial setup, we aim to make your experience with our mobile POS app as smooth and efficient as possible.

2 Online/Offline Indicator

At the top of the screen, you'll notice a blinking indicator designed to provide real-time feedback on the status of your connectivity. This indicator serves as a crucial tool for ensuring seamless operations, distinguishing between online and offline modes.

- Green Line (Online): When the indicator displays a green line, it signifies that the Mobile Point of Sale (POS) application is currently connected to the internet and operating in online mode. In this state, you can process transactions, synchronize data, and access online features without interruption.
- Red Line (Offline): Conversely, if the indicator displays a red line, it indicates that the Mobile POS application is currently offline, meaning there's no active internet connection. While in offline mode, certain functionalities may be limited, and transactions may need to be processed manually or stored locally until connectivity is restored.



By providing a clear visual cue of the online/offline status, the indicator helps you stay informed about the connectivity status of your Mobile POS application, enabling you to take appropriate actions to ensure smooth and uninterrupted operations. Let's keep an eye on the indicator as we navigate through the application and adapt to varying connectivity conditions.

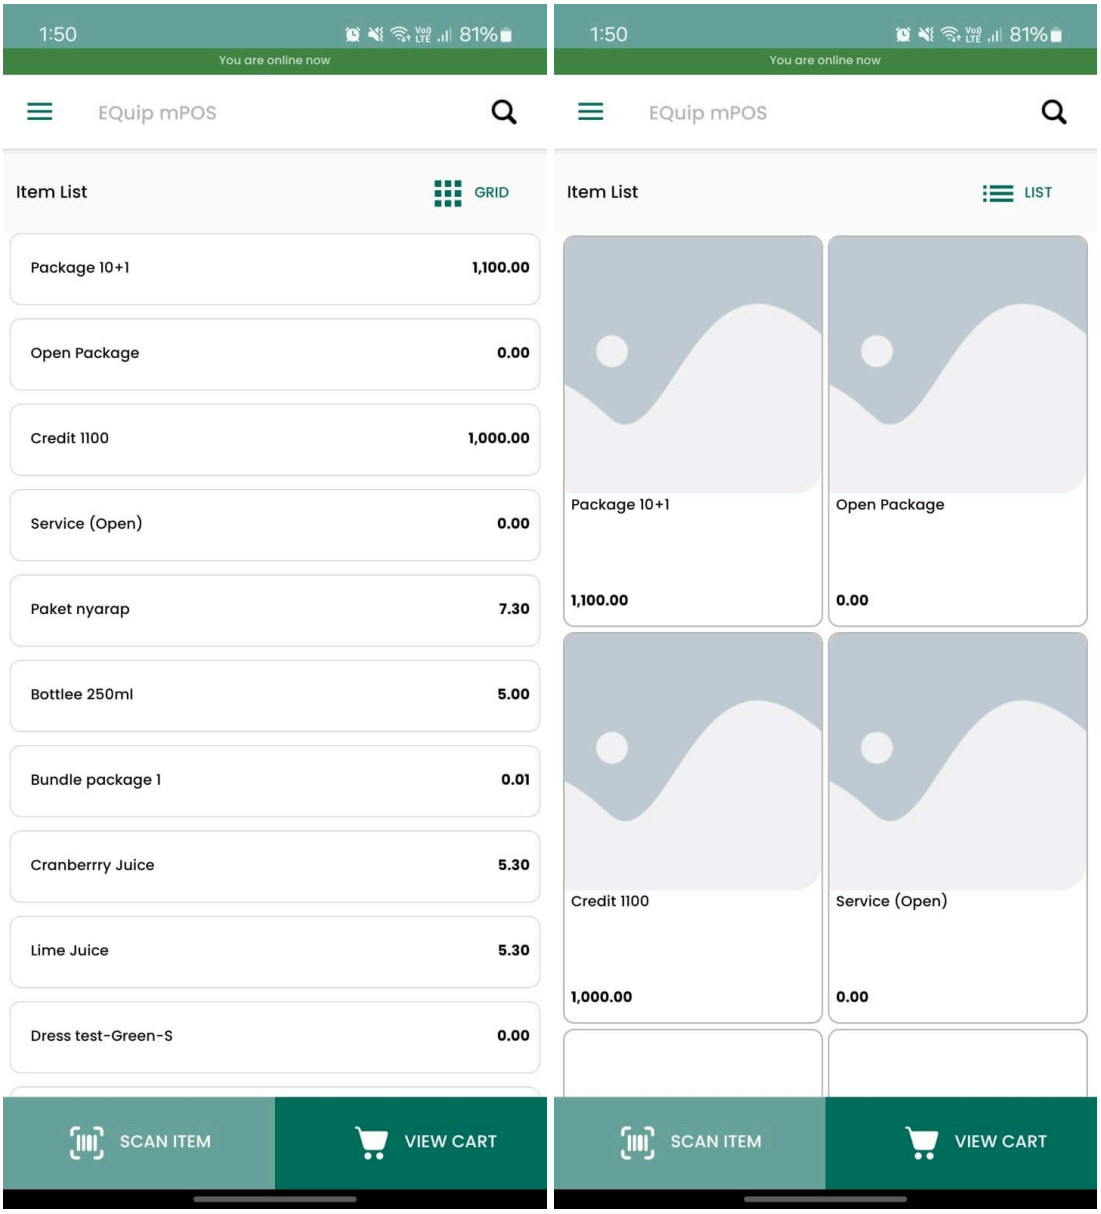
3 Item Page

3.1 Exploring Item: Viewing and Adding to Cart

After logging in, you'll land on the Item List page, where you can browse through all the items available for sale. This page provides two viewing options: Grid View and List View.

- Grid View: In Grid View, you'll see a visual representation of the items with their names, prices, and images displayed in a grid layout. This view allows for quick visual identification of items.
- List View: Alternatively, List View presents the items in a more compact list format, showing item names and prices without images. This view might be preferable if you prefer a simpler, text-based display.

Regardless of your preferred view, each item is accompanied by its name and price for easy reference.

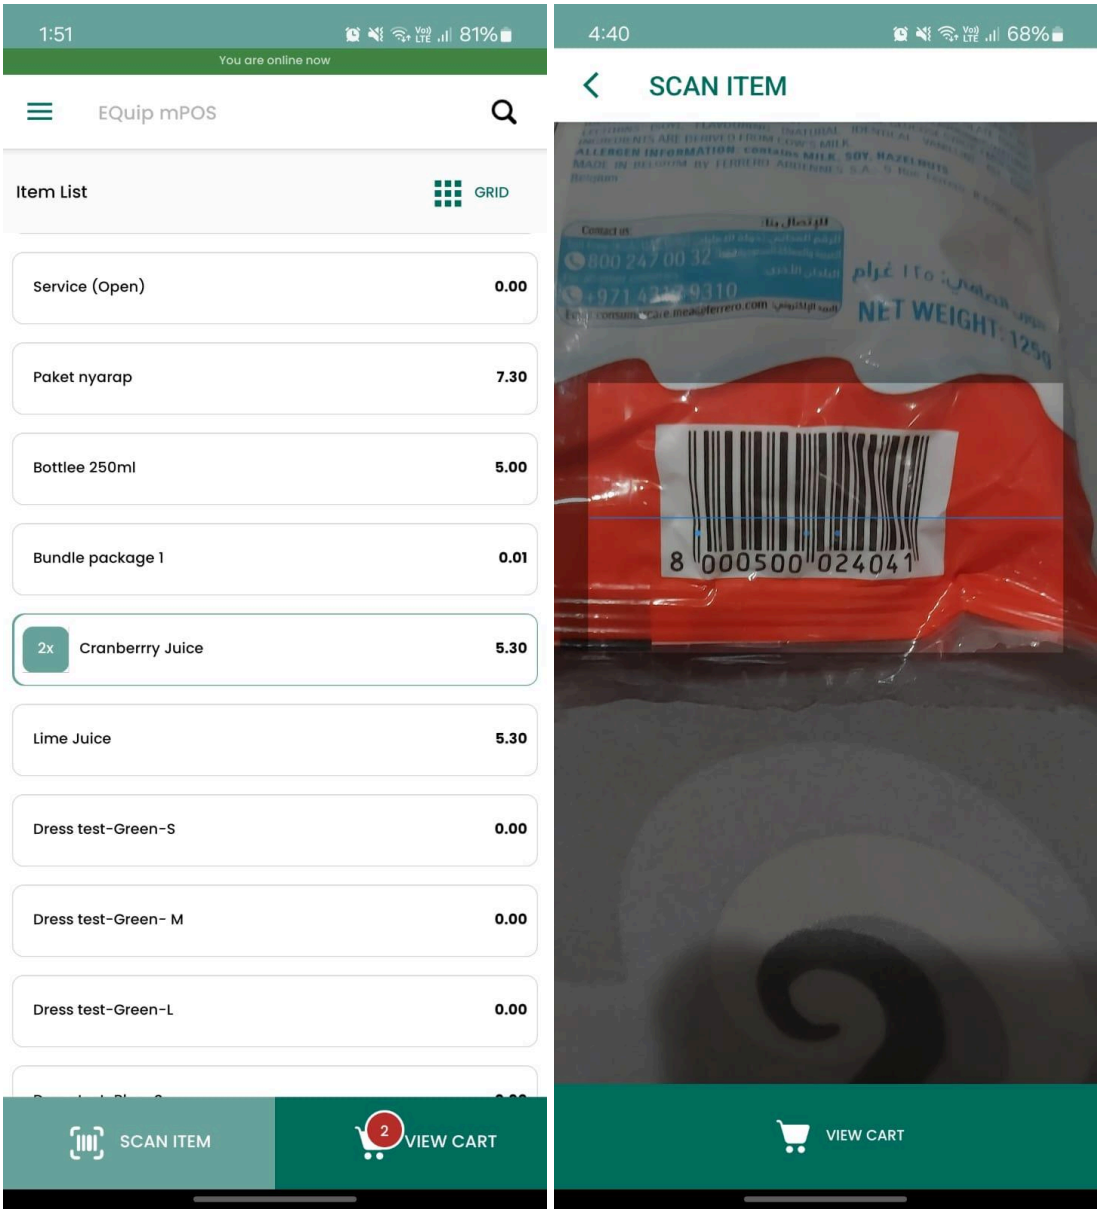


3.2 Adding Items to Cart

Adding items to the cart is straightforward. You have two options:

1. Direct Selection: Simply click on the item you want to add to your cart. This action will immediately add the item to your cart, and you can proceed to checkout whenever you're ready.
2. Using "SCAN ITEM" Button: If you prefer a faster way to add items, you can utilize the "SCAN ITEM" button. Clicking this button will activate your device's camera, allowing you to scan the barcode of the item you wish to add to your cart. Once scanned, the item will be

automatically added, and you can continue shopping or proceed to checkout.



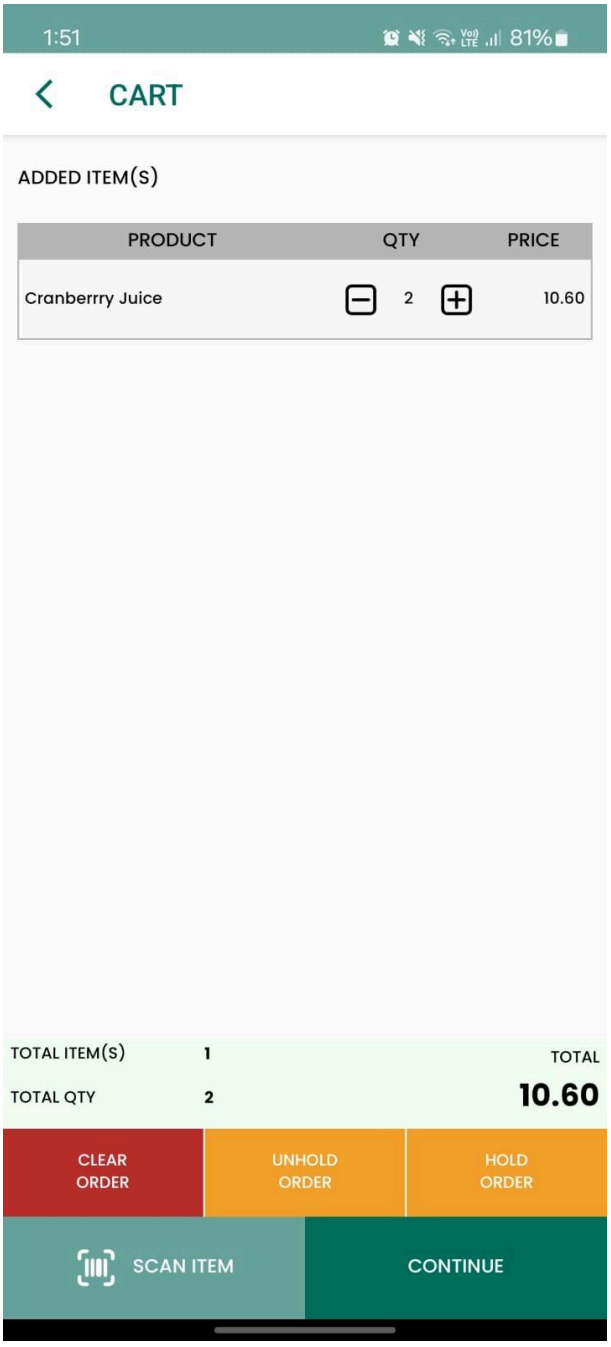
Whether you prefer browsing visually through the grid or quickly scanning barcodes, our mobile POS app provides intuitive options for adding items to your cart efficiently.

4 Cart Page

Once you've added items to your cart, you can review and manage them by clicking the "VIEW CART" button.

4.1 Customizing Quantities

In the Cart page, you'll find a list of all the items you've added, along with their quantities and prices (already inclusive of taxes). To adjust the quantity of any item, simply update the quantity value accordingly. This allows you to customize your order to match your customers' needs accurately.



4.2 Holding and Unholding Orders

Sometimes, you might need to temporarily pause an order. For such cases, we provide the "HOLD ORDER" button. Clicking this button will hold the current order, preventing any changes or further processing until you're ready to resume. Conversely, if you need to reactivate a held order, you can do so with the "UNHOLD ORDER" button.

4.3 Clearing Items

If you need to start over or remove specific items from your cart, you can use the "CLEAR ORDER" button. This action will remove all items from the cart, giving you a clean slate to begin anew.

4.4 Summary and Total

At the bottom of the Cart page, you'll find a summary section displaying essential information about your order:

- Total Items: The total number of unique items in your cart.
- Total Quantity: The total quantity of all items combined.
- Total Amount: The total amount to be paid, already inclusive of taxes.

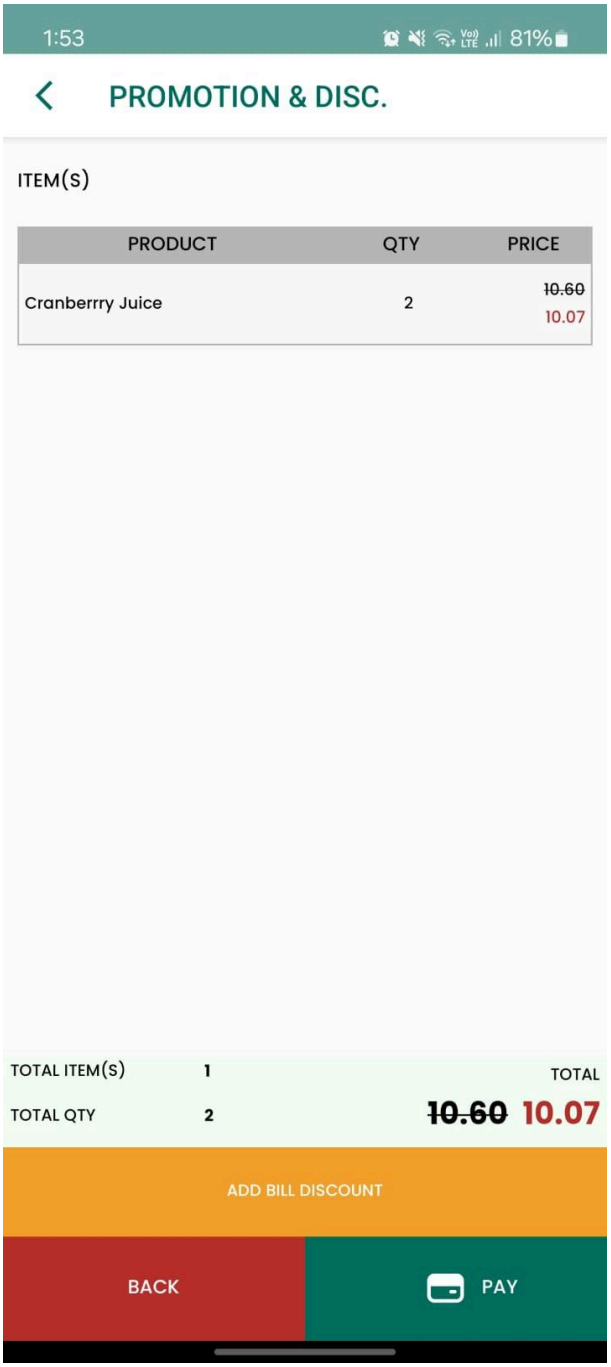
Please note that the prices displayed on this page do not include promotion prices or discounts. These will be applied on the next page before finalizing your order. With these features, managing your cart becomes a seamless and flexible process, allowing you to cater to your customers' needs efficiently.

5 Promotion and Discount Page

After reviewing your cart, clicking "CONTINUE" will lead you to the Promotion and Discount page. Here, you'll find opportunities to save on your purchase through promotions and additional discounts.

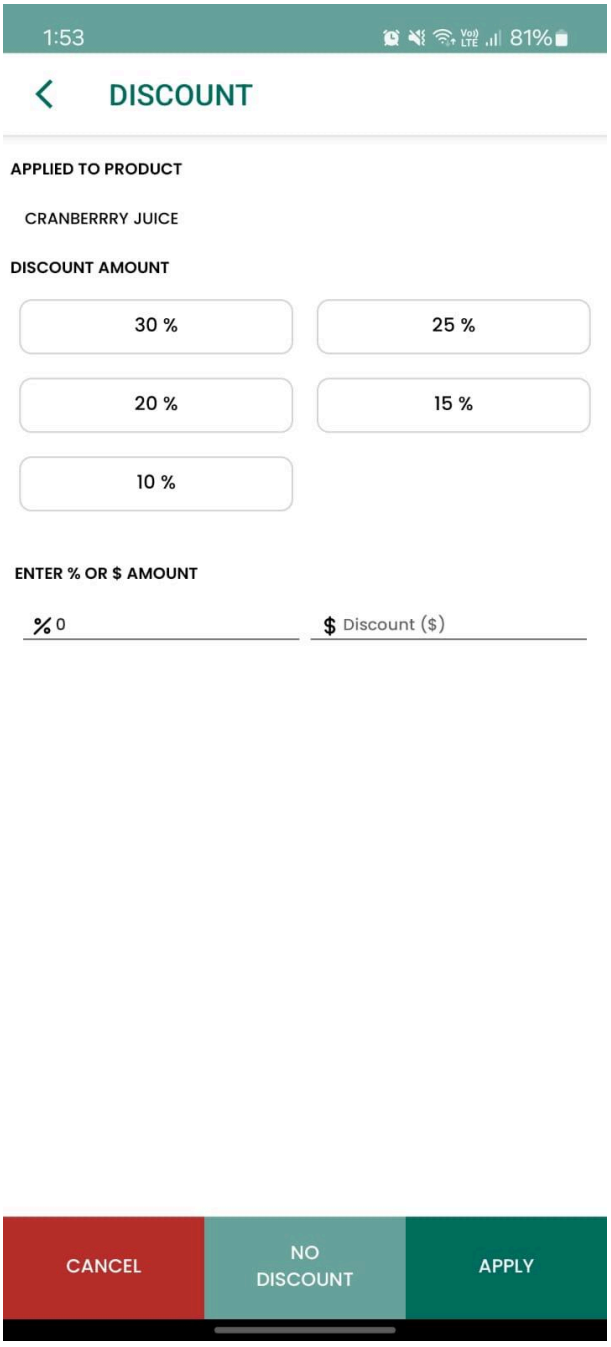
5.1 Promotion Deduction

Items eligible for promotions will have their prices automatically adjusted. You'll notice a strikethrough price, indicating the original price, alongside the discounted price. This makes it easy to see the savings you're receiving on each item.

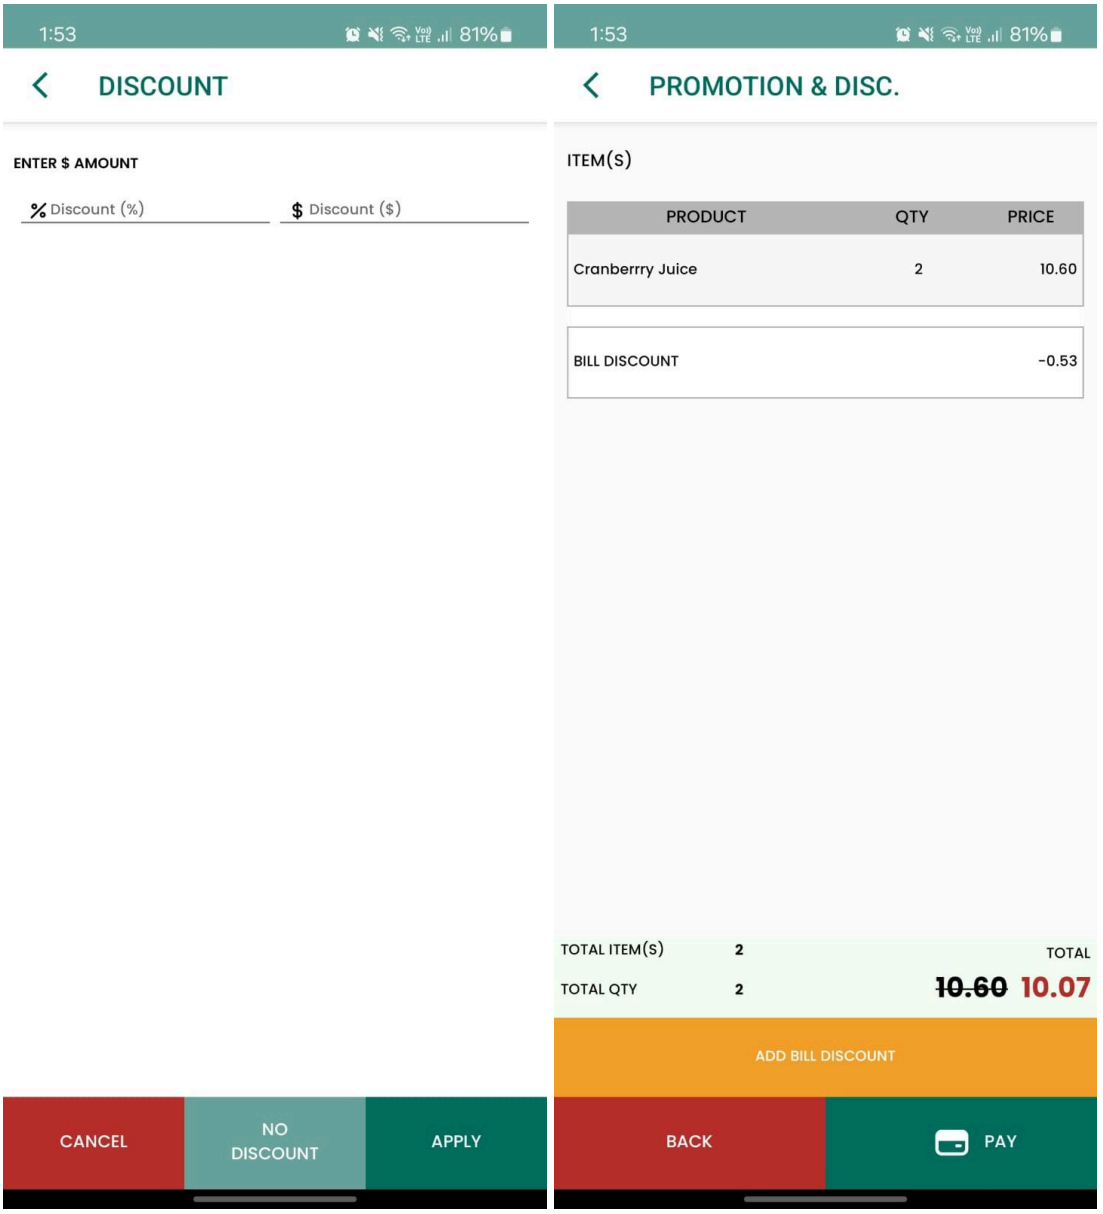


5.2 Adding Additional Discounts

1. Line Item Discount: To apply a discount to a specific item, simply click on the item. You'll then have the option to add a discount, either as a percentage or a specific amount. You can manually enter the amount or choose from pre-created discount options.



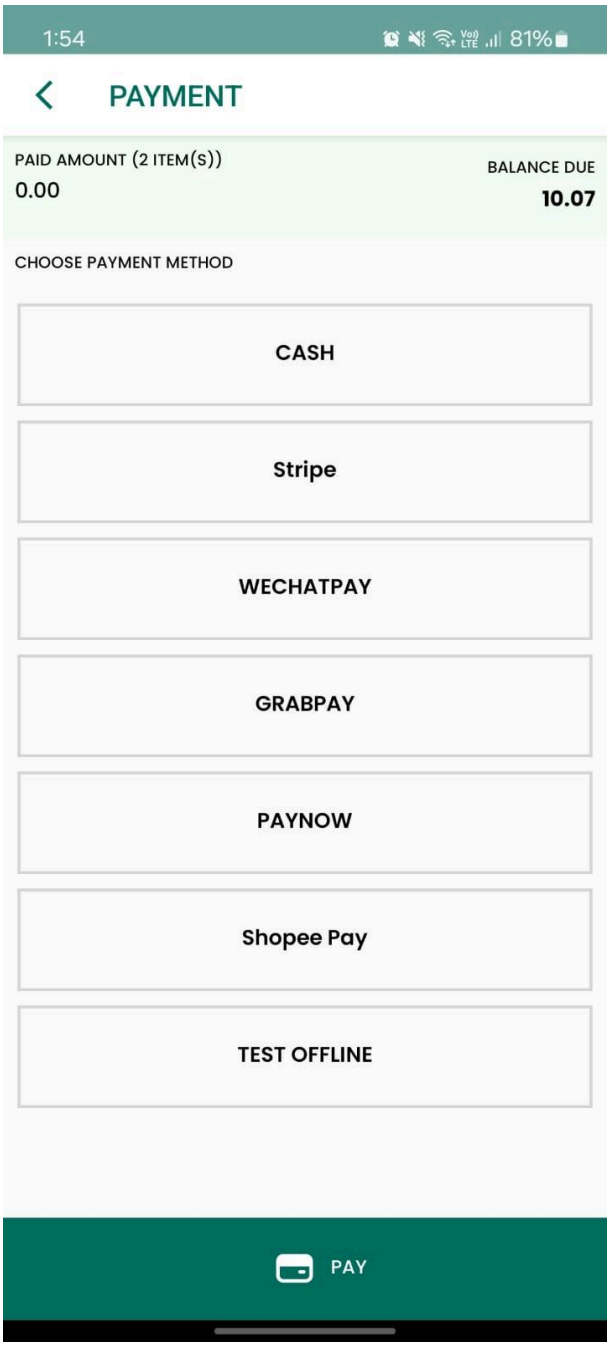
2. Bill Discount: If you have a discount that applies to the entire bill, click "ADD BILL DISCOUNT". Here, you can enter either a percentage discount or a specific amount to be deducted from the total bill.



By offering these flexible discount options, we empower you to maximize your savings and provide value to your customers.

6 Payment Page

After adjusting your promotions and discounts, clicking "PAY" will direct you to the Payment page. Here, you can finalize your transaction securely and conveniently.



6.1 Amount Summary

At the top of the page, you'll see two important pieces of information:

- Paid Amount: This shows the total amount already paid.
- Amount Due: The remaining balance that needs to be paid to complete the transaction.

6.2 Payment Methods

In the bottom section of the page, you'll find a variety of payment methods available for selection. These may include options like credit/debit cards, cash, mobile payment apps, and more. Choose the method that works best for you or your customer.

6.3 Collected Amounts

Once you've selected a payment method, you'll be directed to a popup where you'll input the collected amount. Simply enter the amount collected from the customer into the designated field. Once you've inputted the collected amount, the selected payment method will be saved automatically.
This streamlined process ensures accurate recording of payments and simplifies the checkout experience for you and your customers.

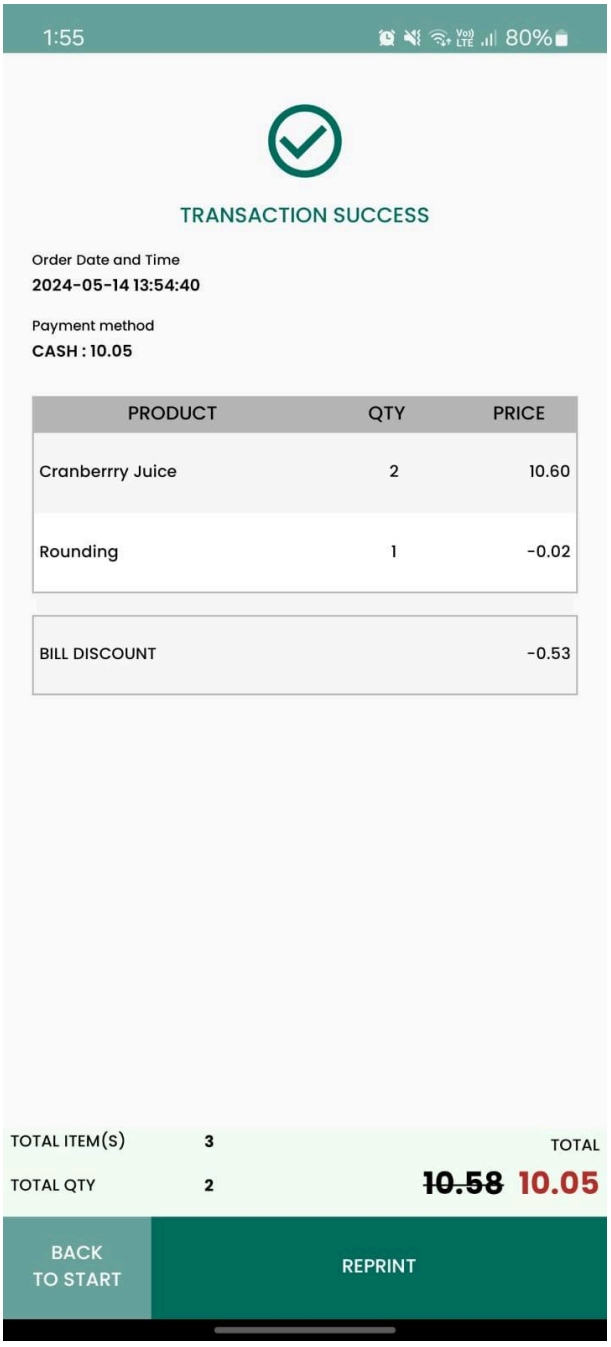
7 Transaction Summary Page

Once the payment method is saved, clicking "PAY" will initiate the payment process. If the payment is successful, you'll be directed to the "TRANSACTION SUCCESS" page. Here, you'll receive confirmation of the successful transaction, and if a printer is set up, a receipt will be printed automatically.

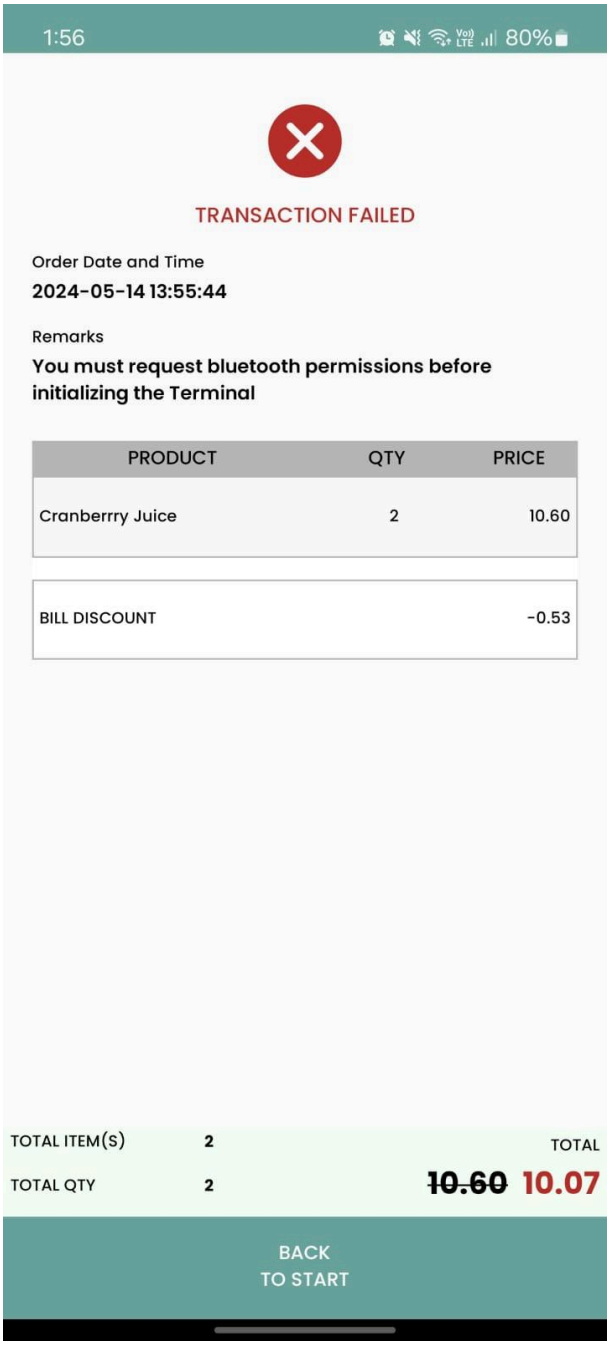
7.1 Transaction Success Page

On this page, you'll find details confirming the successful completion of your transaction. Additionally, you'll have the option to reprint the receipt if needed.



7.2 Transaction Failure Page

In the event of a failed transaction, you'll be directed to the "TRANSACTION FAILED" page. Here, you'll receive notification of the unsuccessful transaction, and also the reason of the failed transaction.



7.3 “Back to Start” Button

Both the Transaction Success and Failure pages feature an option labeled "BACK TO START". Clicking this option will return you to the starting point of the transaction process. For successful transactions, this will send you back to the Item List page, allowing you to continue with further transactions. On the other hand, for failed transactions, clicking "BACK TO START" will also redirect you to the Item List page. But don’t worry, your cart won’t be

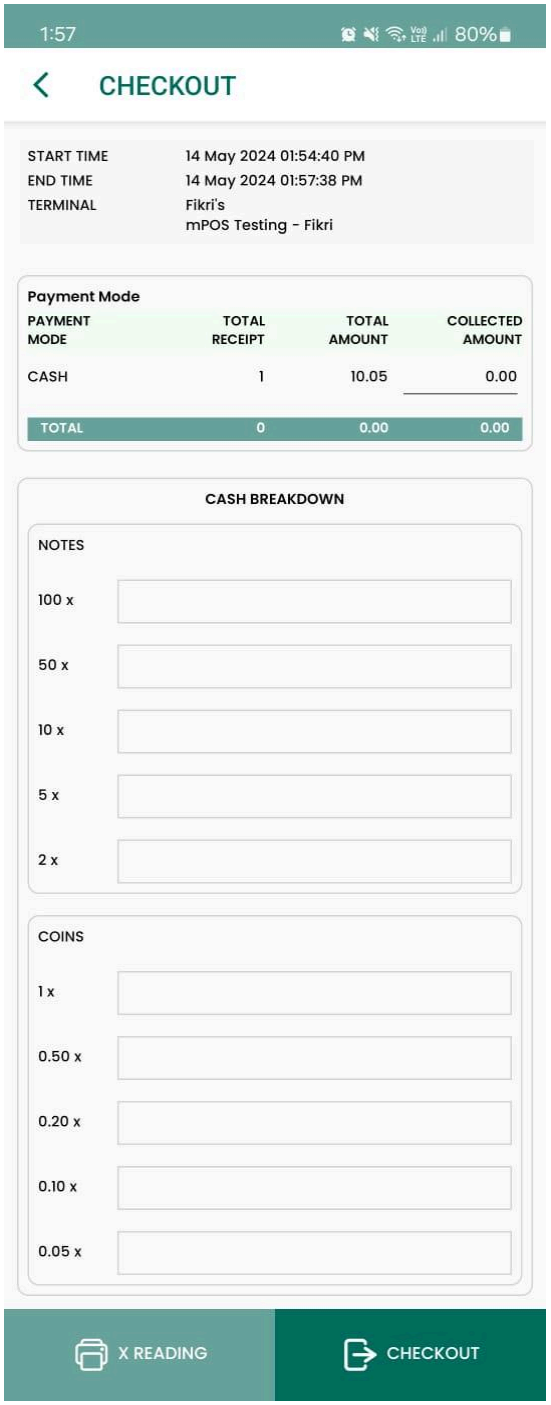
removed so you can review and potentially rectify any issues without the need to start again from the beginning. By providing clear feedback and options for both successful and failed transactions, we aim to ensure a smooth and efficient transaction experience for you and your customers.

8 Checkout

To conclude your shift and perform closing duties, access the hamburger menu and click "Checkout". This action will direct you to the Checkout page, where you'll finalize the transactions for the day.

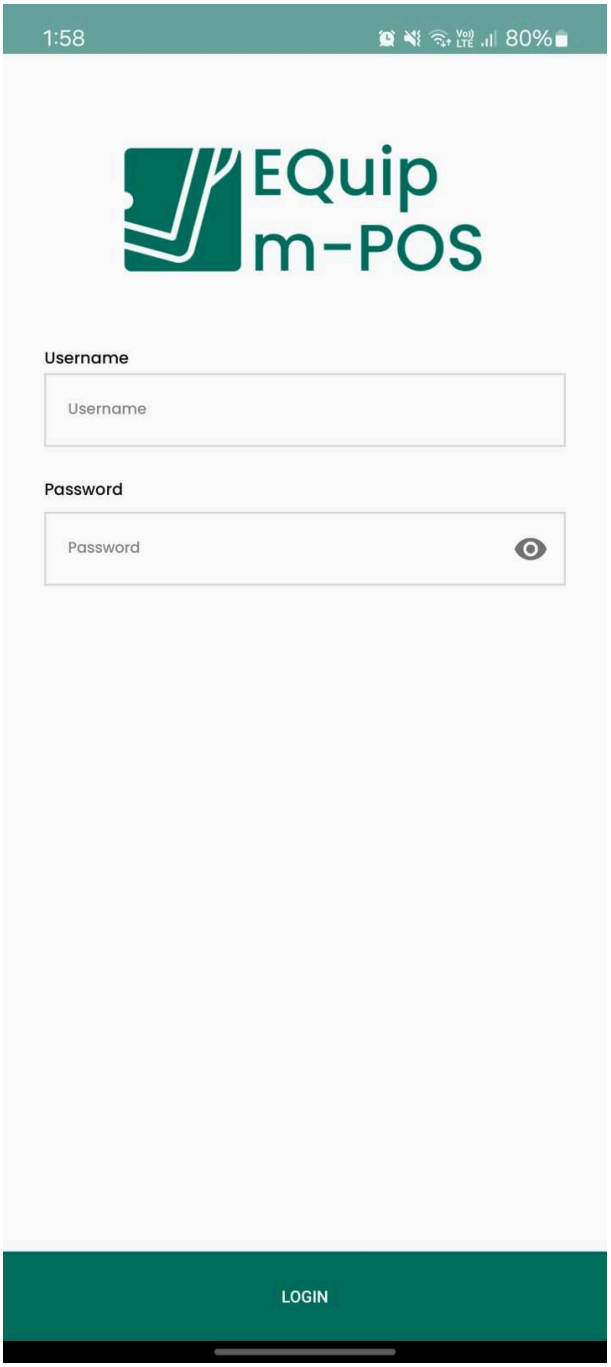
8.1 Entering Collected Amounts

On the Checkout page, you'll input the amounts collected during your shift. It's essential to ensure that the collected amount tallies with the transactions recorded. If there's a discrepancy, you'll receive a prompt indicating that the collected amount doesn't match. This verification step helps maintain accuracy in your financial records.



8.2 Proceeding to Checkout

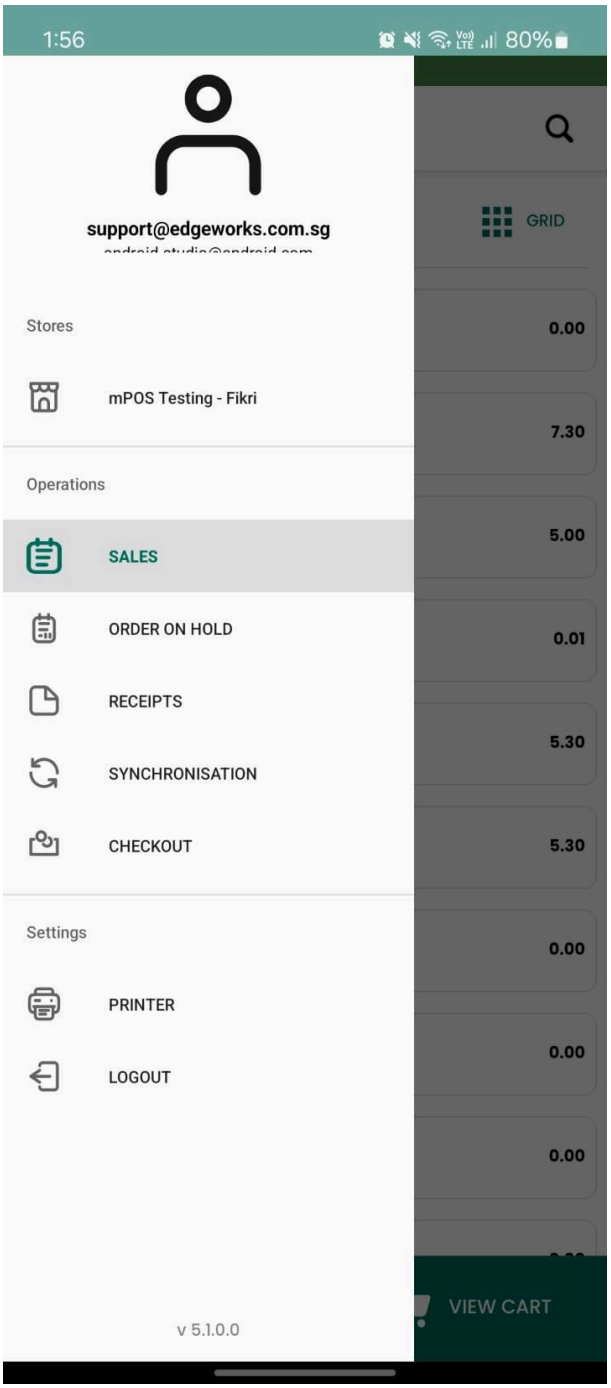
Once you've confirmed that the collected amount matches the transactions, proceed to checkout. Upon doing so, you'll be automatically logged off from the Mobile POS system.



Performing closing duties through the Checkout page streamlines the end-of-shift process, ensuring accurate reconciliation of transactions and facilitating a smooth transition for the next shift. Let's proceed to the Checkout page and wrap up your shift efficiently.

9 Hamburger Menu

The hamburger menu, located in the top left corner of the screen, provides access to various sections and operations within the Mobile Point of Sale (POS) application. It's divided into three main sections:



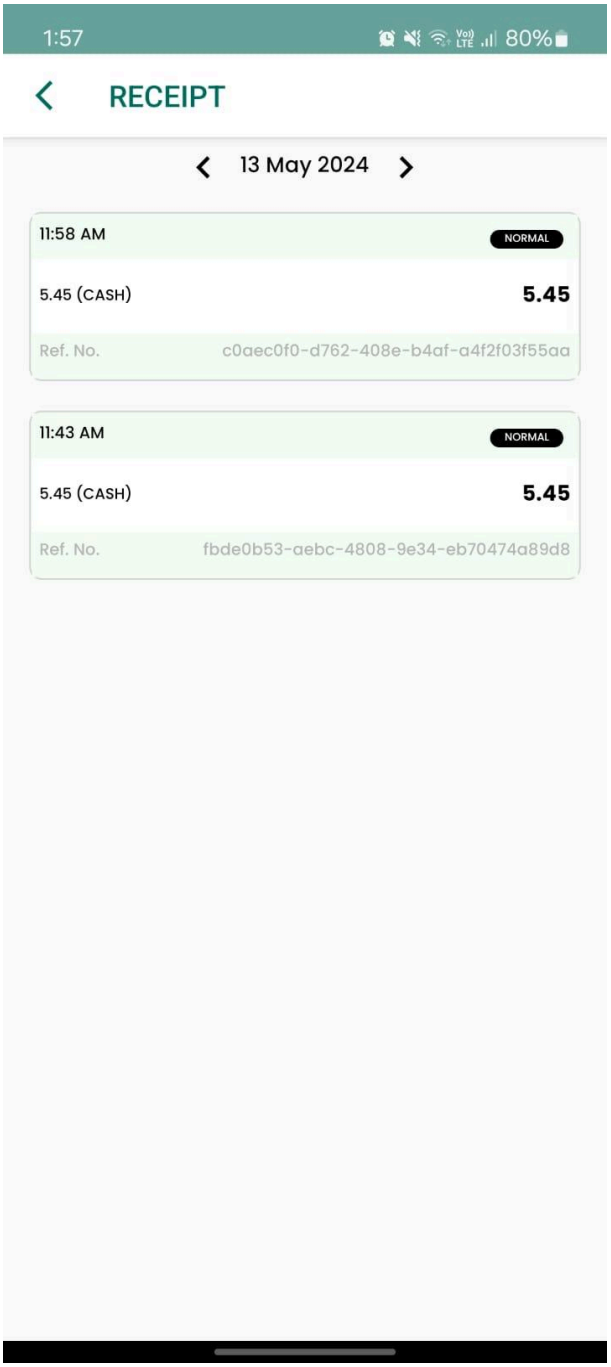
9.1 Stores

In this section, you'll find information about the Point of Sale (POS) you're currently using. It typically displays the name of the POS, helping you identify the location or branch you're operating from.

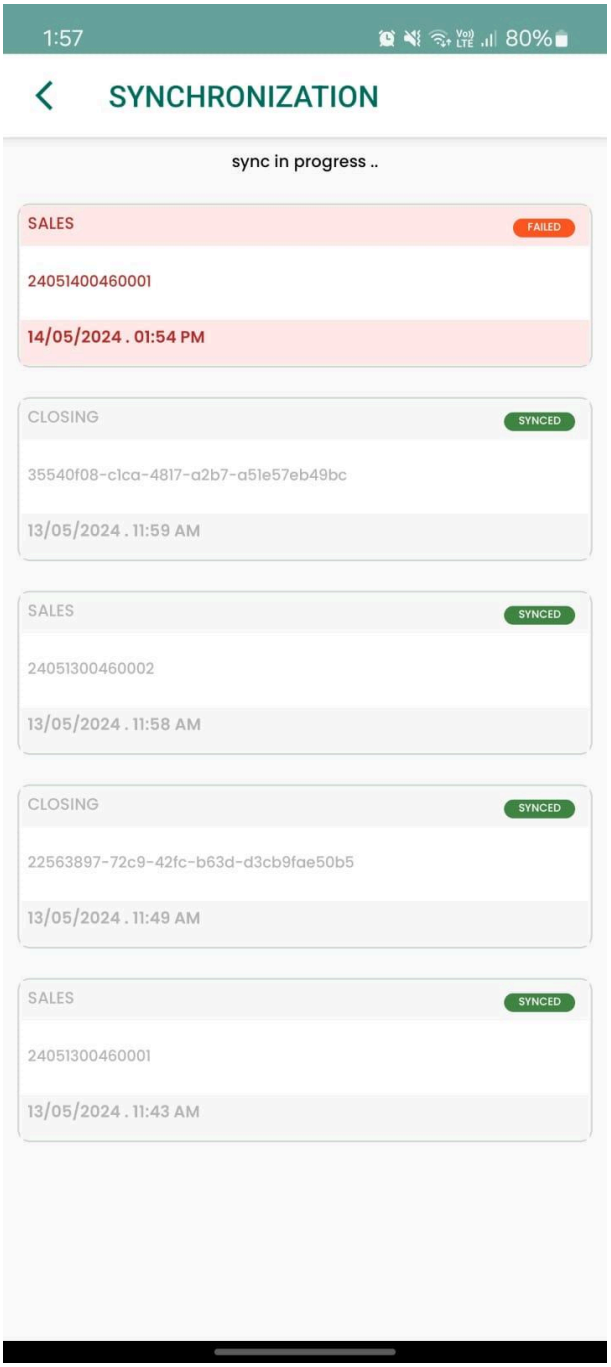
9.2 Operations

Under the Operations section, you'll find several menus to help you manage sales and transactions efficiently:

- Sales: This menu takes you directly to the item page, where you can view and add items to the cart for transactions.
- Order on Hold: Here, you can view a list of orders that have been put on hold, allowing you to manage them accordingly.
- Receipts: This menu provides access to a list of past transactions and their corresponding receipts, facilitating easy retrieval for reference or reprinting.



- Synchronization: By accessing this menu, you can check the status of synchronization between the Mobile POS application and the physical POS system, ensuring data consistency.



- Checkout: Clicking this option directs you to the Checkout page, where you can perform closing duties and finalize transactions.

9.3 Settings

The Settings section offers options to customize and manage the Mobile POS application according to your preferences:

- Printer: This menu allows you to set up and configure the printer for receipt printing, ensuring seamless transaction processes.
- Logout: Clicking this option logs you out from the Mobile POS application, ending your current session.

The hamburger menu serves as a centralized hub for accessing various features and functionalities of the Mobile POS application, empowering you to efficiently manage sales operations and settings. Let's explore the menu and leverage its capabilities to enhance your workflow.

Closing

We hope this user guide has provided you with a comprehensive understanding of our Mobile Point of Sale (POS) system. By following the instructions and utilizing the features outlined in this guide, you can ensure efficient and seamless transactions, enhancing your business operations and customer experience.

If you have any further questions or need additional support, please do not hesitate to contact our support team. We are here to help you make the most out of our Mobile POS system.

Thank you for choosing our Mobile POS system. We look forward to supporting your business needs and helping you achieve greater efficiency and success.
